Auditors have issued qualified opinion on the presentation of long term debts as explained below:

- At the reporting date, the Company could not make timely repayments of principal and interest / mark-up related to long term debts and during the period certain financial and other covenants imposed by the lenders could not be complied with. International Accounting Standard on Presentation of financial statements (IAS – 1) requires that if an entity breaches a provision of a long-term loan arrangement on or before the end of the reporting period with the effect that the liability becomes payable on demand, it should classify the liability as current. However, in these financial statements the long term debts have been classified as long term according to the individual loan repayment schedules as the management believes that event of default has not been declared by the lenders.
