Till June 30, 2017, the Company has utilized the proceeds of the initial public offer of 29,001,000 ordinary shares for the purposes mentioned under heading 5.5 'Expansion Plan' in prospectus dated 28 December 2015, as per the following detail:

	<u>997,362,916</u>	

The un-utilized proceeds of the public offer have been safely kept by the Company in the shape of bank balances, term deposit receipts and mutual fund.

As stated in the prospectus dated 28 December 2015, the Company planned to offer state of the art retail outlets across Pakistan with multitude of unique services and also planned to install additional filling lines at the blending plant of its subsidiary. The plan of 2015-16 covered 37 grand outlet openings in 11 major cities of Pakistan including Lahore, Gujranwala, Sialkot, Faisalabad, Multan, Islamabad, Rawalpindi, Karachi & Hyderabad. Over a period of 5 years, the Company planned to open 75 retail outlets (including 67 rented) across 16 major cities of Pakistan. The Company planned to invest further in its wholly owned subsidiary company, Hi-Tech Blending (Private) Limited to introduce Jerry Can and Drum filling lines. As per quarterly progress report number 06 dated 14 July 2017, the Company informed all stakeholders the progress on implementation of project: Expansion through retail outlet: 1 Owned service centre under regulatory approval and out of the 10 rented service centres, 1 is operational, 3 are approved and under construction, 3 are under regulatory approvals and 3 are under negotiations.

Accurate, effective and timely implementation of the above plans of the Company became a big challenge for the Company due to expensive lands and properties at key locations in almost all the cities for express service centers. Hence, the Company has now planned for incorporation of Express Centers into its fuel stations to be established under the umbrella of Oil Marketing Company Project of the HTL (OMC). In this regard, the Company has obtained a financial feasibility report from KPMG Taseer Hadi & Co., Chartered Accountants, Pakistan regarding investment in OMC project. Salient Features of the Project are as follows:

The Project envisages setting up 360 retail outlets across Punjab, Sindh and KP Provinces of Pakistan. The fuel stations will offer full range of services such as general store, tire shop and a car shop amongst others. To support sales, the Company plans to invest in building storage capacities of 25,735 metric tons (Mogas and HSD) across the country over a period of 7-years. The funds will be arranged 50% from equity and 50% through debt. Key results are expected to be:

Based on the assumption and valuation metrics, the project provides the following results:

NPV of PKR 5.1 Billion assuming a WACC of 11.16 %

IRR of 23.6%

Payable period of 7.0 years

Average net profit margin of 0.43%

During the year, OGRA has granted license to the Company to establish an Oil Marketing Company (OMC), subject to some conditions. Conceptual design of oil storage depot has been completed and project has been awarded for construction of the same. No objection certificates are expected to be received soon. On approval construction would start. The completion of storage is expected in the 2nd quarter ending December 2017.

Currently demand of fuel is met by 13 major oil marketing companies, with Pakistan State Oil Company Limited having the lion's share of total market share with 3,700 plus filling stations across Pakistan. Other key players include Shell Pakistan Limited, Total Parco Pakistan Limited, Attock Petroleum Limited, Hascol Petroleum Limited and Byco Petroleum Pakistan Limited. During 2015, Total Parco Pakistan

Limited formally acquired the filling station network of Chevron Pakistan, which included 538 retail outlets giving Total Parco a total network strength of approximately 814 outlets. International oil prices have fallen from USD 145.31 in 2008 to below USD 45 in August 2017. The Government of Pakistan has partially passed on the relief to end consumers by reducing the retail price of MOGAS from PKR 113.24 in Oct 2013 to PKR 62.77 in August 2017. The reduction in sale price, coupled with poor supply of CNG, directly affected the demand and it was a possible reason for the fuel shortage crises of January 2015. Demand of petroleum products have been steadily increasing at a rate of 4.35% from 2005-06 to 2014-15. The demand is further being fueled by a recovering economy and healthy per capita income of general population – a scenario further supported by increasing sales of automotive vehicles.

Projected balance sheet, projected income statement and projected cash flow statement of the Project are given below:
