**PRESS RELEASE  
FROM LUCKY CEMENT LIMITED  
ON GETTING LICENCE FROM BIS INDIA**

We are pleased to inform all concerned through this Press Release that the Lucky Cement Limited has been granted the required license by the Bureau of Indian Standards for export of cement to India. This is a land mark achievement both for Company and the Country as **Lucky Cement has become the first Pakistani cement manufacturer who has been issued this license for selling its high quality cement into the Indian markets.**

On the back drop of huge construction activities all around India, the demand of cement is growing @ 10% to 12% year on year basis, which has resulted in huge shortage of cement. On the other hand, our country has substantial surplus capacity of cement which can be exported for earning precious foreign exchange needed badly by our Country. Beside this, the export of cement to India will also help to reduce existing trade imbalance in favour of our country.

Lucky Cement has good export orders from various buyers of the Indian market. The Company anticipates that a sizable quantity of cement will be exported to India in coming days and Lucky Cement will have a leading position because of its advantage of plant location near Sea Port.
