Economic Review

The National Economy accelerated its pace to revival during the financial year 2014-15. The major factors behind the steady economic restoration were the concrete measures in the shape of reforms initiatives, better fiscal and monetary management. During the year under review inflation hit its lowest levels since 2003-04. The policy rate recorded its lowest of last 42 years. Historical agreements have been signed with China to establish corridor between the two countries. Stock market index also created history.

Strengths are always accompanying by weaknesses. Socioeconomic weaknesses hit the economy in an adverse way during the year under review. At the start of the financial year, the economy faced stagnancy like situation due to political uncertainty amid prolonged sit-in in the capital city. The nation has also been facing acute security challenges which are not abolished yet completely. However, we are hopeful for more prosperity in future.

Future Projects

In view of current market scenario and increasing demand of safety (tempered) glass, the need of high technology in value added glass has gained much importance. The Company has decided to induct a new high tech plant for Safety Glass along with necessary allied utilities. For the purpose, the board of directors has approved to issue 59% right shares at par value of Rupees 10 each. The funds generated from the right issue would be utilized to install hi tech plant for safety glass. Moreover, the impact of spectrum line would also be witnessed in the near future In Sha Allah.

Review Report

To the Members on the Statement of Compliance with the Best Practices of the Code of Corporate Governance

We have reviewed the Statement of Compliance with the best practices (the Statement) contained in the Code of Corporate Governance (the Code) for the year ended 30 June 2015 prepared by the Board of Directors of **Ghani Value Glass Limited** (the Company) to comply with the Listing Regulation No. 35 of the Karachi Stock Exchange Limited and Lahore Stock Exchange Limited, where the Company is listed.

The responsibility for compliance with the Code is that of the Board of Directors of the Company. Our responsibility is to review, to the extent where such compliance can be objectively verified, whether the Statement reflects the status of the Company's compliance with the provisions of the Code and report if it does not. A review is limited primarily to inquiries of the Company's personnel and review of various documents prepared by the Company to comply with the Code.

As part of our audit of financial statements, we are required to obtain an understanding of the accounting and internal control systems sufficient to plan the audit and develop an effective audit approach. We are not required to consider whether the Board's statement on internal control covers all risks and controls, or to form an opinion on the effectiveness of such internal controls, the Company's corporate governance procedures and risks.

Further, the Listing Regulations of the Karachi Stock Exchange Limited and Lahore Stock Exchange Limited requires the Company to place before the Board of Directors for their consideration and approval of related party transactions, distinguishing between transactions carried out on terms equivalent to those that prevail in arm's length transactions and transactions which are not executed at arm's length price recording proper justification for using such alternate pricing mechanism. Further, all such transactions are also required to be separately placed before the audit committee. We are only required and have ensured compliance of requirement to the extent of approval of related party transactions by the board of directors and placement of such transactions before the audit committee. We have not carried out any procedures to determine whether the related party transactions were undertaken at arm's length price or not.

Based on our review, nothing has come to our attention which causes us to believe that the Statement of Compliance does not appropriately reflect the status of Company's compliance, in all material respects, with the best practices contained in the Code as applicable to the Company for the year ended 30 June 2015.

Further, we have highlighted below instance of non-compliance with the requirements of the Code as reflected in the paragraph references where these are stated in the Statement:

Paragraph Reference	Description
9	The Board has not arranged any training program for any of its director during the year.

3. BASIS FOR PREPARATION

3.1. Basis of presentation and measurement

These financial statements have been prepared under the historical cost convention except for the land which is stated at revalued amount.

3.2. Functional and presentation currency

These financial statements are presented in Pak Rupee, which is the Company's functional and presentation currency. Figures have been rounded to nearest rupee.

4. SIGNIFICANT ACCOUNTING POLICIES

4.1. Significant accounting judgments and estimates

The preparation of financial statements in conformity with approved accounting standards requires the use of certain critical accounting estimates. It also requires management to exercise its judgment in the process of applying the Company's accounting policies. Estimate and judgments are continually evaluated and are based on historic experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. In the process of applying the Company's accounting policies, management has made the following estimates and judgments which are significant to these financial statements:

Useful life and residual values of property, plant & equipment

The Company has made certain estimates with respect to residual value, depreciation method and depreciable lives of property, plant and equipments. Further, the Company reviews the value of assets for possible impairment on each reporting period. Any change in the estimates in future years might affect the remaining amounts of respective items of property, plant and equipments with corresponding effect on the depreciation charge and impairment.

Impairment of non-financial assets

The carrying amounts of the Company's assets are reviewed at each balance sheet date to determine whether there is any indication of impairment. If such indication exists, the asset's recoverable amount is estimated in order to determine the extent of impairment loss, if any. Impairment losses are charged to profit and loss.

Provision for taxation

In making the estimates for income taxes payable by the Company, the management considers current income tax law and the decision of appellate authorities on certain cases issued in past.

Trade receivables

The Company reviews its trade receivables at each reporting date to assess whether provision should be recorded in the profit and loss account. In particular, judgment by management is required in the estimation of amount and timing of future cash flows when determining the level of provision required. Such estimates are based on assumptions about a number of factors and actual results may differ, resulting in future changes to the provisions.

Other areas where estimates and judgments are involved are disclosed in respective notes to the financial statements.

4.2. Property, plant and equipment

Operating fixed assets

These, except for freehold land which is stated at revalued amount, are stated at cost less accumulated depreciation and impairment loss, if any.

Depreciation is calculated using reducing balance method at the rates disclosed in relevant note, which are considered appropriate to write-off the cost of the assets over their estimated remaining useful lives.

Depreciation on additions is charged from the month in which an asset is acquired or capitalized while no depreciation is charged for the month in which the asset is disposed-off.

The carrying amount of the Company's assets is reviewed at each balance sheet date to determine whether there is any indication of impairment. If any such indication exists, the carrying amounts of such assets are reviewed to assess

whether they are recorded in excess of their recoverable amount. Where carrying values exceed the respective recoverable amount, assets are written down to their recoverable amounts and the resulting impairment is recognized in the income in the current period. The recoverable amount is the higher of an asset's fair value less cost to sell and value in use. Where an impairment loss is recognized, the depreciation charge is adjusted for the future periods to allocate the asset's revised carrying amount over its estimated useful life.

Subsequent cost are included in the asset's carrying amount or recognized as separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. All other repair and maintenance costs are charged to income during the year in which they are incurred.

The gain or loss on disposal or retirement of an asset represents the difference between the sale proceeds and the carrying amount of the asset and is recognized as an income or expense in the period it relates.

Capital work-in-progress

These are stated at cost less impairment loss, if any. All expenditure, connected to the specific assets, incurred during installation and construction period are carried under capital work-in-progress. These are transferred to specific assets as and when assets are available for use.

4.3. Stores, spares and loose tools

These are valued at lower of moving average cost and net realizable value less provision for slow moving and obsolete stores, spares and loose tools. The stock-in-transit is valued at cost

4.4. Stock-in-trade

These are stated at the lower of cost and net realizable value. The method used for the calculation of cost is as follows:

Raw materials	- weighted moving average cost.
Finished goods	- weighted moving average cost which consists of prime cost and appropriate manufacturing overheads.

Net realizable value signifies the selling price in the ordinary course of business less cost necessary to be incurred to affect such sale.

4.5. Trade debts and other receivables

Trade debts are carried at original invoice amount less an estimate for doubtful debts based on review of outstanding amounts at the year-end. Bad debts are written-off when identified.

4.6. Cash and cash equivalents

Cash and cash equivalents are carried in the balance sheet at cost. For the purposes of cash flow statement, cash and cash equivalents comprise of cash-in-hand and bank balances.

4.7. Staff retirement benefit

Define contribution plan

The Company operates a provident fund scheme covering for all its eligible employees. Equal monthly contributions are made by the Company and employees to the fund at the rate of 8.33% of gross salary of employees.

4.8. Trade and other payables

Liabilities for trade and other amount payable are carried at cost, which is the fair value of the consideration to be paid in the future for goods and services received, whether or not billed to the Company.

4.9. Provisions

Provisions are recognized in the balance sheet when the Company has a present legal or constructive obligation as a result of past events and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate of the obligation can be made. However, provisions are reviewed at each balance sheet date and adjusted to reflect the current best estimate.

4.10. Taxation

Current

Provision for current taxation is based on taxable income at the current rates of taxation after taking into account tax credits available, if any and tax paid on final tax regime basis.

Deferred

Deferred tax is provided in full using the balance sheet liability method on all temporary differences arising at the balance sheet date, between the tax bases of the assets and the liabilities and their carrying amounts. Deferred tax liabilities are generally recognized for all taxable temporary differences and deferred tax assets are recognized for all deductible temporary differences, unused tax losses and unused tax credits to the extent that it is probable that future taxable profits will be available against which these can be utilized.

Deferred tax is calculated at the rates that are expected to apply to the period when the difference reverse, based on tax rates that have been enacted or substantively enacted by the balance sheet date.

4.11. Revenue recognition

Revenue from sale of goods is recognized when the significant risks and rewards of ownership of the goods have been transferred to the buyer i.e. on dispatch of goods to customer.

Return on bank deposit is recognized on a time proportion basis on the principal amount outstanding and the rate applicable.

4.12. Foreign currency transactions

Transactions in foreign currencies are initially recorded at the rates of exchange ruling on the dates of transactions. Monetary assets and liabilities denominated in foreign currencies are translated into Pak Rupees at the exchange rates prevailing on the balance sheet date. All exchange differences are charged to profit and loss account.

4.13. Financial assets and liabilities

All the financial assets and financial liabilities are recognized at the time when the Company **becomes a party to the contractual provisions of the instruments. The Company derecognizes** a financial asset or a portion of financial asset when, and only when, the enterprise loses control of the contractual rights that comprise the financial asset or portion of financial asset. While a financial liability or part of financial liability is derecognized from the balance sheet when, and only when, it is extinguished, i.e. when the obligation specified in the contract is discharged, cancelled or expires.

Financial assets are investments, deposits, trade debts, advances, other receivables, cash and bank balances. These are stated at their fair value as reduced by the appropriate allowances for estimating irrecoverable amount.

Financial liabilities are classified according to the substance of the contractual arrangements entered into. Significant financial liabilities are short term running finance utilized under mark-up arrangements, creditors, accrued and other liabilities. Mark-up bearing finances are recorded at the gross proceeds received. Other liabilities are stated at their nominal value.

4.14. Off-setting of financial instruments

Financial assets and liabilities are off-set and the net amount is reported in the balance sheet when there is a legally enforceable right to set-off the recognized amounts and there is an intention to settle on a net basis, or realize the asset and settle the liability simultaneously.

4.15. Impairment

The carrying amounts of the Company's assets are reviewed at each balance sheet date to determine whether there is any indication of impairment loss. If any such indication exists, the recoverable amount of the assets is estimated in order to determine the extent of impairment loss, if any. Impairment losses are recognized as expense in the profit and loss account.

4.16. Related party transactions

Sale, purchase and other transactions with related parties are made at arm's length prices determined in accordance with the comparable uncontrolled price method.

4.17. Dividend and appropriation to reserves

Dividend distribution to the Company's shareholders and appropriation to reserves are recognized in the period in which these are approved. Dividend distribution to the Company's shareholders and appropriation to reserves are recognized in the period in which these are approved.

28 FINANCIAL INSTRUMENTS AND RELATED DISCLOSURES

The Company finances its operations through equity and management of working capital with a view to maximize the return to the stakeholders. The Company is exposed to market risk, credit risk and liquidity risk. The Company's principle financial liabilities comprise trade and other payables. The main purpose of these financial liabilities is to raise finance for the Company's operations. The Company has various financial assets such as advances, deposits, trade and other receivables and cash and bank balances, which are directly related to its operations.

28.1 Market risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market prices comprise three types of risk: interest rate risk, currency risk and other price risk. Financial instruments susceptible to market risk include trade and other payables and receivables. The sensitivity analysis in the following sections relate to the position as at 30 June 2015 and 2014.

28.1.1 Interest rate risk

Interest rate risk is the risk that the fair value of future cash flows of the financial instruments will fluctuate because of changes in market interest rates. The Company has no interest bearing borrowings at the year end, however, the Company is exposed to interest rate risk on balance placed in profit or loss sharing bank accounts.

Increase / decrease in basis points	Effect on profit before tax	
	2015 Rupees	2014 Rupees
+10%	220,643	226,361
-10%	(220,643)	(226,361)

28.1.2 Foreign currency risk management

Foreign currency risk arises mainly due to fluctuation in foreign exchange rates. The Company also has transactional currency exposure. Such exposure arises from sales and purchases of certain materials by the Company in currencies other than rupees. None (2014: 2%) of the Company's sales are denominated in currencies other than rupees, while almost 100% (2014: 98%) of sales are denominated in local currency.

The following table demonstrates the sensitivity to a reasonably possible change in the Euro and USD exchange rates. As at 30 June 2015, if Pakistani Rupee (PKR) had weakened/strengthened by 5% against the foreign currency, with all other variables held constant, the effect on the Company's profit before tax (due to changes in the fair value of monetary assets and liabilities) at 30 June 2015 and 2014 is as follows:

	Increase / decrease in EURO / USD to Pak Rupee	Effect on profit before tax	
		2015 Rupees	2014 Rupees
EURO			
Pak rupees	+5%	(404,728)	(955,842)
Pak rupees	-5%	404,728	955,842
USD			
Pak rupees	+5%	73,282	38,890
Pak rupees	-5%	(73,282)	(38,890)

28.1.3 Other price risk

Other price risk is the risk that the fair value of future cash flows of the financial instruments will fluctuate because of changes in market prices such as equity price risk. Equity price risk is the risk arising from uncertainties about future values of investment securities. As at the balance sheet date, the Company is not materially exposed to other price risk.

28.2 Credit risk

Credit risk represents the accounting loss that would be recognized at the reporting date if the counter parties failed to perform as contracted. The Company manages credit risk by limiting significant exposure to any individual customers, by obtaining security deposits against sales and does not have significant exposure to any individual customer. The carrying values of financial assets susceptible to credit risk but not impaired are as under:

	2015 Rupees	2014 Rupees
Long term deposits	4,633,044	4,633,044
Trade debts - considered good	86,871,631	77,248,729

Bank balances	21,018,007	34,897,875
	113,585,629	117,730,025

Credit quality of financial assets

The credit quality of cash at bank (in currency and deposit account) as per credit rating agencies are as follows:

	Rating		Rating Agency	2015	2014
	Short term	Long term		Rupees	Rupees
MCB Bank Limited	A1+	AAA	PACRA	3,436,527	8,111,903

Burj Bank	A-2	A-	JCR-VIS	109,871	3,015,178

28.3 Liquidity risk

Liquidity risk reflects the Company's inability in raising funds to meet commitments. Management closely monitors the Company's liquidity and cash flow position. This includes maintenance of balance sheet liquidity ratios, debtors and creditors concentration both in terms of the overall funding mix and avoidance of undue reliance on large individual customer.

	On demand Rupees	Total Rupees

Trade and other payables	157,818,937	157,818,937
	<u>157,818,937</u>	<u>157,818,937</u>

28.4 Capital risk management

The primary objective of the Company's capital management is to maintain healthy capital ratios, strong credit rating and optimal capital structures in order to ensure ample availability of finance for its existing and potential investment projects, to maximize shareholder value and reduce the cost of capital.

The Company manages its capital structure and makes adjustment to it, in light of changes in economic conditions. In order to maintain or adjust the capital structure, the Company may adjust the amount of dividends paid to shareholders, return capital to shareholders or issue new shares. No changes were made in the objectives, policy and processes during the year ended 30 June 2015.

The Company finances its operations through equity and managing working capital. The Company has no gearing risk in current year that needs to be managed as it does not have any long term borrowings.

28.5 Fair value of financial assets and liabilities

Fair value is the amount for which an asset could be exchanged, or a liability can be settled, between knowledgeable willing parties in an arm's length transaction. The carrying value of all financial assets and liabilities reflected in the financial statements approximate their fair values.
