Chairman's Review

I am pleased to present review of IGI Life Insurance Limited as Chairman for the year ended December 31, 2019.

During the year, there was an increase in gross premium. However, the financial performance was adversely impacted by expenses on the introduction of a new product 'Vitality' and implementation of IT based core business application catering to Life insurance businesses. Board of Directors played an active role in guiding the management in the introduction of new products based on Vitality and upgradation of company's IT legacy application.

The Board comprises of directors having varied background and rich experience in the fields of business, insurance, finance and regulations. The Board has provided strategic direction to the management and ensured compliance with all regulatory requirements by the management. The Board has also provided guidance to the management from time to time. As required under the Code of Corporate Governance, the Board has evaluated its own performance through a mechanism developed by it and the Chairman has assessed the performance of each director.

The Board has constituted Audit Committee, Human Resources and Ethics Committee, Claims Settlement Committee, Underwriting and Reinsurance Committee, Investment Committee and Risk Management and Compliance Committee. These committees have met every quarter prior to the meetings of the Board. These committees provided valuable input and assistance to the Board. The Audit Committee particularly focused on effectiveness of internal controls while the Risk and Compliance Committee identified risks and recommended mitigation measures.

Chairman

Directors' Report to the Members

The Directors of your Company take pleasure in presenting to you the 25th Annual Report of the Company along with the audited financial statements for the year ended December 31, 2019.

The year 2019 was an eventful year for the Company with the launch of our flagship product Vitality. This product is a shared value wellness program, which rewards the policyholder for maintaining a healthier lifestyle. The program branded as "IGI Life Vitality" has been introduced in collaboration with Vitality Group International. The program captures physical activity of the policyholders in real time and qualifies them for both short and long-term rewards upon meeting certain fitness targets. Through Vitality, we aim to promote an active Life Insurance for a healthier Pakistan.

This program required a large investment in our IT systems in addition to payment of franchise fees and building up our distribution platform. Hence, the Board of Directors of the Company, in its meeting held on June 14, 2019, had approved the issuance of right shares amounting to Rs 1 billion. This injection of fresh equity enabled the Company to maintain sufficient solvency margins despite investing in this major project.

The Company believes with this product it is much better equipped to create value for its shareholders and policyholders alike in the years to come.

Independent Auditor's Review Report

To the members of IGI Life Insurance Limited

Review Report on the Statement of Compliance contained in Listed Companies (Code of Corporate Governance) Regulations, 2019 and Code of Corporate Governance for Insurers, 2016

We have reviewed the enclosed Statement of Compliance with the Listed Companies (Code of Corporate Governance) Regulations, 2019 and Code of Corporate Governance for Insurers, 2016 (both herein referred to as 'Regulations') prepared by the Board of Directors of IGI Life Insurance Limited (the Company) for the year ended December 31, 2019 in accordance with the requirements of regulation 36 the Listed Companies (Code of Corporate Governance) Regulations, 2019 and provisions of Code of Corporate Governance for Insurers, 2016.

The responsibility for compliance with the Regulations is that of the Board of Directors of the Company. Our responsibility is to review whether the Statement of Compliance reflects the status of the Company's compliance with the provisions of the Regulations and report if it does not and to highlight any non-compliance with the requirements of the Regulations. A review is limited primarily to inquiries of the Company's personnel and review of various documents prepared by the Company to comply with the Regulations.

As a part of our audit of the financial statements we are required to obtain an understanding of the accounting and internal control systems sufficient to plan the audit and develop an effective audit approach. We are not required to consider whether the Board of Directors' statement on internal control covers all risks and controls or to form an opinion on the effectiveness of such internal controls, the Company's corporate governance procedures and risks.

The Regulations require the Company to place before the Audit Committee, and upon recommendation of the Audit Committee, place before the Board of Directors for their review and approval, its related party transactions and also ensure compliance with the requirements of section 208 of the Companies Act, 2017. We are only required and have ensured compliance of this requirement to the extent of the approval of the related party transactions by the Board of Directors upon recommendation of the Audit Committee. We have not carried out procedures to assess and determine the Company's process for identification of related parties and that whether the related party transactions were undertaken at arm's length price or not.

Based on our review, nothing has come to our attention which causes us to believe that the Statement of Compliance does not appropriately reflect the Company's compliance, in all material respects, with the requirements contained in the Regulations as applicable to the Company for the year ended December 31, 2019.

Further, we highlight below an instance of non-compliance with the requirement of the Code as reflected in the paragraph reference where it is stated in the Statement of Compliance:

Paragraph Reference	Description

Information Other than the Financial Statements and Auditor's Report Thereon

Management is responsible for the other information. The other information comprises the information included in the annual report, but does not include the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management and Board of Directors for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with the accounting and reporting standards as applicable in Pakistan and the requirements of Insurance Ordinance, 2000 and Companies Act, 2017 (XIX of 2017) and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Board of Directors are responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs as applicable in Pakistan will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs as applicable in Pakistan, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the board of directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the board of directors with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with the board of directors, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on Other Legal and Regulatory Requirements

Based on our audit, we further report that in our opinion:

- a) proper books of account have been kept by the Company as required by the Insurance Ordinance, 2000 and the Companies Act, 2017 (XIX of 2017);
- b) the statement of financial position, the profit and loss account, the statement of comprehensive income, the statement of changes in equity and the cash flow statement together with the notes thereon have been drawn up in conformity with the Insurance Ordinance, 2000, the Companies Act, 2017 (XIX of 2017), and are in agreement with the books of account;
- c) the apportionment of assets, liabilities, revenue and expenses between two or more funds has been performed in accordance with the advice of the appointed actuary;

الحمد لله رب العالمين والصلوة والسلام على سيد الانبياء والمرسلين محمد النبي
الأمي وعلى آله واصحابه أجمعين، وبعد!

الحمد لله، میں نے " آئی جی آئی لائف، ونڈو تکافل آپریشنز " (آئندہ اسے " ونڈو تکافل " کہا جائے گا) کے مالیاتی اسٹیٹمنٹس برائے سال 2019 کا شرعی نقطہ نظر سے جائزہ لیا۔

میں " ونڈو تکافل " کے شریعہ ایڈوائزر کی حیثیت سے اس بات سے بخوبی باخبر ہوں کہ " ونڈو تکافل " کے شرکاء تکافل اور شیئرز ہولڈرز کے مابین تمام مالی معاملات اور مختلف عقود و معاہدات کو شرعی قواعد و ضوابط کے مطابق یقینی بنانا میری ذمہ داری ہے۔ اسی طرح ونڈو تکافل کی منظمہ کمیٹی کی بھی یہ ذمہ داری ہے کہ وہ شریعہ ایڈوائزر کی طرف سے جاری کردہ اصول و ضوابط اور گائیڈ لائنز پر اہتمام کے ساتھ عمل کرنے کو یقینی بنائے اور تمام تکافل پالیسیاں اور خدمات شرعی قواعد و ضوابط کے مطابق اور باقاعدہ شریعہ ایڈوائزر سے منظور شدہ ہوں۔

یہ بات اہم ہے کہ ونڈو تکافل نے ابتداء ہی سے اس بات کا اہتمام کیا ہے کہ شریعہ ایڈوائزر کی جانب سے جاری کردہ ہدایات پر اہتمام سے عمل کیا جائے اور تمام تکافل پالیسیاں، خدمات اور مختلف فنڈز کی سرمایہ کاری شرعی قواعد و ضوابط کے مطابق انجام دی جائے اور یہ باقاعدہ شریعہ ایڈوائزر سے منظور شدہ بھی ہوں۔

بہر حال میری معلومات کے مطابق:

- سال 2019 کے اختتام تک ونڈو تکافل کی جانب سے کئے گئے تمام مالی معاملات شریعہ ایڈوائزر کی جانب سے دی گئی گائیڈ لائنز اور تکافل رولز 2012 کے مطابق تھے۔
- البتہ ونڈو تکافل کے چند معاملات ایسے تھے، جو شریعت کی رو سے قابل اصلاح تھے، کمیٹی کی منظمہ کمیٹی سے ان معاملات پر بات چیت کر کے باقاعدہ ان کی اصلاح کر دی گئی ہے اور آئندہ بھی شریعہ گائیڈ لائنز پر اہتمام سے عمل کرنے کی ہدایت کر دی گئی ہے۔
- الحمد لله، بحیثیت مجموعی ونڈو تکافل کے تمام معاملات کو شریعہ گائیڈ لائنز اور قواعد و ضوابط کے مطابق پایا۔

2.1 Statement of compliance

These financial statements have been prepared in accordance with the accounting and reporting standards as applicable in Pakistan. The accounting and reporting standards comprise of:

- International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board (IASB) as are notified under the Companies Act, 2017; and
- Provisions of and directives issued under the Companies Act, 2017, Insurance Ordinance, 2000, Insurance Rules 2017, Insurance Accounting Regulations, 2017 and Takaful Rules, 2012.

In case requirements differ, the provisions or directives of the Companies Act, 2017, the Insurance Ordinance, 2000, the Insurance Rules, 2017, the Insurance Accounting Regulations, 2017 and the Takaful rules, 2012 shall prevail.

2.2 Standards, interpretations of and amendments to the accounting and reporting standards that are effective in the current year:

The Company has applied the following standards for the first time for their accounting period commencing January 1, 2019:

2.2.1 Effective from January 1, 2019, the Company has adopted IFRS 16: 'Leases' which has replaced IAS 17, 'leases.' The standard addresses recognition and measurement of leases for both lessor and lessee. The impacts of adoption of IFRS 16 are further given in note 4.1 to these financial statements.

2.2.2 IFRS 9 'Financial Instruments' and amendment (effective for period ending on or after June 30, 2019). IFRS 9 replaces the existing guidance in IAS 39 Financial Instruments: Recognition and Measurement. IFRS 9 includes revised guidance on the classification and measurement of financial instruments, a new expected credit loss model for calculating impairment on financial assets, and new general hedge accounting requirements. It also carries forward the guidance on recognition and derecognition of financial instruments from IAS 39.

Further, IFRS 4 provides two alternative options in relation to application of IFRS 9 for entities issuing contracts within the scope of IFRS 4, notably a temporary exemption and an overlay approach. The temporary exemption enables eligible entities to defer the implementation date of IFRS 9. The overlay approach allows an entity applying IFRS 9 from the effective date to remove from profit or loss the effects of some of the accounting mismatches that may occur from applying IFRS 9 before IFRS 17 is applied. The Company has adopted the temporary exemption which allows the Company to defer the application of IFRS 9 until December 31, 2021.

For the companies adopting the temporary exemption, the IFRS 4 requires certain disclosures which have been disclosed in note 2.2.2.1.

2.2.2.1 TEMPORARY EXEMPTION FROM APPLICATION OF IFRS 9

As an insurance company, the management has opted temporary exemption from the application of IFRS 9 as allowed by International Accounting Standards Board (IASB) for entities whose activities are predominantly connected with insurance. 3 BASIS OF MEASUREMENT

These financial statements have been prepared under the historical cost convention except as disclosed in accounting policies relating to investments and staff retirement benefits scheme.

3.1 FUNCTIONAL AND PRESENTATION CURRENCY

These financial statements are presented in Pak Rupees, which is the Company's functional and presentation currency.

3.2 Use of estimates and judgments

The preparation of financial statements in conformity with the requirements of accounting and reporting standards as applicable in Pakistan requires management to make judgments / estimates and associated assumptions that affect the application of policies and reported amounts of assets, liabilities, income and expenses. The judgments / estimates and associated assumptions are based on historical experience, current trends and various other factors that are believed to be reasonable under the circumstances, the result of which form the basis of making estimates about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates. Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the year in which the estimate is revised and in any future periods affected in accordance with the requirements of International Accounting Standard - 8, "Accounting Policies, Changes in Accounting Estimates and Errors".

Significant areas where assumptions and estimates were exercised in application of accounting policies, otherwise that are disclosed in these financial statements, relate to:

3.2.1 Policyholders' liabilities

Mortality and Interest Bases adopted

SECP vide its circular 17/2013 dated September 13, 2013 has stipulated that SLIC(2001)05 Individual Life Mortality Table published by Pakistan Society of Actuaries be used as the minimum valuation basis prescribed under SECP's notification S.R.O 16(1)/2012. A test was previously conducted to compare the existing valuation basis i.e. EFU (1961)66 mortality table with the minimum valuation basis SLIC (2001)05 for the relevant reserves. The test revealed that the existing valuation basis was more prudent than the minimum valuation basis and therefore it was considered to be more appropriate to continue with the existing valuation basis.

The rate of discount was taken as 3.75% in line with the requirements under SECP's notification S.R.O 16(1)/2012, for determining reserves of traditional products and supplementary coverage. Any differential between the assumed rate and the actual rate is intended to be available to the Company for meeting its administrative expenses.

General Principles adopted for valuation

The general principles adopted in the actuarial valuation to estimate policyholders' liabilities as at December 31, 2019 in accordance with the Annexure 5 to Rule 23 of the Insurance Rules, 2017 are as follows:

- a) Reserves for Endowment Policies with term not less than 20 years have been calculated using Full Preliminary Term Method with EFU (1961-66) Ultimate Mortality Table at 3.75%.
- b) Reserves for Endowment Policies with term less than 20 years have been calculated using combination of Full Preliminary Term Method and Net Level Premium Method with EFU (1961-66) Ultimate Mortality Table at 3.75%.
- c) Term Policies are calculated using Net Level Premium Method with EFU (1961-66) Ultimate Mortality Table at 3.75%.
- d) Reduced Paidups and Extended Term insurances have been valued by Net Single Premium Method with EFU (1961-66) Ultimate Mortality Table at 3.75%.
- e) Bonus Reserves have been valued by Net Single Premium Method with EFU (1961-66) Ultimate Mortality Table at 3.75%.
- f) Loyalty Bonus Reserves have been valued by Net Single Premium Method at 3.75% for active policies.
- g) In respect of Unit Linked policies, the reserve for bid value of allocated units is calculated using the latest bid value of units and the total number of units belonging to policyholders' accounts as at the valuation date. The amount is held as a reserve since it represents the current value of amounts that will be payable to policyholders at the time when a maturity, death or surrender claim is filed. The latest bid value is the last "announced" bid price before the valuation date.
- h) Universal Life business has been valued using full account values. No deduction has been made for surrender charges.
- i) An 'Asset Liability mismatch reserve' has been kept in the Individual Life Non - Participating Fund as a result of the ALM exercise carried out to assess the interest rate risk, credit risk and equity risk.
- j) Group Life Insurance, Individual Accident & Health Insurance and Group Accident & Health have been valued using Unearned Gross Premium.
- k) Pension business has been valued using full account values.
- l) Unearned premium reserves have been maintained for all riders except Level Term rider reserve which is calculated using Net Level Premium Method with EFU (1961-66) Ultimate Mortality Table at 3.75%.
- m) Reinsurance premium reserves have been maintained on an unearned premium basis.
- n) Reserves have been maintained for Incurred But Not Reported (IBNR) claims which were determined using the Chain-Ladder method based on the claims lag pattern experienced over the past few years.
- o) Reserves for claims payable in instalments have been kept at 3.75%.
- p) Unearned Premium Reserve is kept as half month of Cost of Insurance (COI) for Cost of Insurance (COI) of Universal Life and Unit Linked Policies.
- q) No policy is treated as an asset and in the system if the reserve is negative, the negative value is excluded and the reserves for the policies is set equal to zero.
- r) The Company does not have any insurance policy which is denominated in foreign currency.
- s) Reinstatement reserve have been maintained on universal life and ordinary life policies.

The principles adopted in this valuation were same as those followed in previous valuation as at December 31, 2018.

Surrenders

For the purpose of conventional and annuity business, no provision has been made for lapses and surrenders. This gives prudence to the value placed on the liability by not taking any credits for the profits made on surrenders.

Claims provision

- a) Reserves have been made in respect of all intimated claims. Most claims require lump sum payments, and reserves have been maintained in each Statutory Fund, where applicable. In a small number of cases, claims are payable in instalments over a period of more than twelve months after the valuation date. In respect of all such claims, reserves have been calculated using the minimum valuation basis.
- b) Adequate reserves have also been maintained for Incurred But Not Reported (IBNR) claims which were determined using the Chain and Ladder Method.

3.2.2 Classification of investment and provisions for impairment there against

The Company determines that available for sale equity investments are impaired when there has been significant or prolonged decline in the fair value below its cost. This determination of what is significant or prolonged requires judgment. In making this judgment, the Company evaluates among other factors, the normal volatility in prices. In addition, impairment against investments may be appropriate when there is evidence of deterioration in the financial health of the investee, industry and sector performance, changes in technology and operational and financing cash flows.

The Company has determined fair value of certain investments by using quotations from active market. Fair value estimates are made at a specific point in time, based on market conditions and information about the financial instruments. These estimates are subjective in nature and involve uncertainties and matter of judgment (e.g. valuation, interest rates, etc.) and therefore, cannot be determined with precision.

3.2.3 Income tax

In making the estimates for income taxes currently payable by the Company, the management considers the current income tax laws and the decisions of appellate authorities on certain issues in the past.

3.2.4 Tangible and intangible assets, depreciation and amortisation

In making estimates of the depreciation / amortisation method, the management uses the method which reflects the pattern in which economic benefits are expected to be consumed by the Company. The method applied is reviewed at each financial year end and if there is a change in the expected pattern of consumption of the future economic benefits embodied in the assets, the method would be changed to reflect the change in pattern.

The carrying amounts are reviewed at each reporting date to assess whether these are recorded in excess of their recoverable amounts, and where carrying values exceed estimated recoverable amount, assets are written down to their estimated recoverable amounts.

During the year, the Management has revised its estimates of the useful life of owned and leased motor vehicles. Previously, assets under these categories were depreciated over 3 years and now these are being depreciated over the useful life of 5 years.

The revision has been accounted for as a change in accounting estimate in accordance with the requirements of International Accounting Standards (IAS) - 8 'Accounting policies, changes in accounting estimates and errors'. Had the revision in useful lives of these assets not been made, the depreciation expense for the year would have been higher by Rs. 6.475 million and consequently, loss before tax would have been higher by the same amount.

3.2.5 Defined benefits plans and other benefits

Liability / asset is determined on the basis of actuarial valuation carried out using the Projected Unit Credit Method.

4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The significant accounting policies adopted in the preparation of these financial statements are set out below. These policies have been consistently applied to all the years presented except for the changes in the accounting policies described in note 4.1 below:

- 4.1 'Effective from January 1, 2019, the Company has adopted IFRS 16, "Leases" which replaces existing guidance on accounting for leases, including IAS 17 'Leases', IFRIC 4 'Determining whether an arrangement contains a Lease', SIC-15 'Operating Leases- Incentive and SIC-27 'Evaluating the substance of transactions involving the legal form of a Lease'. IFRS 16 introduces a single, on balance sheet lease accounting model for lessees. A lessee recognises a right-of-use asset representing its right-of-use of the underlying asset and a lease liability representing its obligations to make lease payments. Lessor accounting remains similar to the current standard i.e. lessors continue to classify leases as finance or operating leases. During the year the Company has changed its accounting policy with respect to finance leases in accordance with IFRS 16 - "Leases".

For leases previously classified as finance leases the Company recognised the carrying amount of the lease assets and lease liability immediately before transition as the carrying amount of the right-of-use assets and the lease liability at the date of initial application. The measurement principles of IFRS 16 are applied only after that date. The remeasurements to the lease liabilities are recognised as adjustments to the related right-of-use assets immediately after the date of initial application as disclosed in note 4.1.1.

4.1.1 Impact of IFRS 16

	December 31, 2018	Change	January 1, 2019
-----Rupees in '000-----			
Impact on statement of financial position			
Decrease in vehicles - leased	23,043	(23,043)	-
Increase in right-of-use assets	-	23,043	23,043

The revised accounting policies are disclosed in note 4.11.2 to these financial statements.

On adoption of IFRS 16, the Company has recognised liabilities in respect of leases which had previously been classified as operating leases under IAS 17 except for certain short term leases in accordance with IFRS 16. These liabilities were initially measured at the present value of the remaining lease payments, discounted using the Company's incremental weighted average borrowing rate of 10.55% per annum as of January 1, 2019. The lease liability is subsequently measured at amortised cost using the effective interest rate method.

2019
(Rupees in '000)

Total lease liability recognised 49,567

The expense relating to the aforementioned leases amounts to Rs 1.681 million.

On adoption of IFRS 16, the associated right-of-use assets were measured at the amount equal to the lease liability, adjusted by the amount of prepaid lease payments recognised in the statement of financial position immediately before the date of initial application.

The right-of-use assets recognised subsequent to the adoption are measured based on the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred. The right-of-use assets are depreciated on a straight line basis over the lease term as this method most closely reflects the expected pattern of consumption of future economic benefits. The right-of-use assets are reduced by impairment losses, if any, and adjusted for certain remeasurements of lease liability.

2019
(Rupees in '000)

The recognised right-of-use assets relate to the following type of asset:

Property 17,078

The effects of this change in accounting policy are as follows:

Impact on statement of financial position

Increase in right-of-use assets	17,078
Decrease in prepayments	<u>(2,444)</u>
Increase in total assets	14,634
Increase in borrowings- lease liability against right-of-use assets	<u>15,279</u>
Decrease in net assets	<u>(645)</u>

Impact on profit and loss account

Increase in finance costs	1,680
(Increase)/ decrease in management expenses:	
- Depreciation on right-of-use assets	13,101
- Rent, rates and taxes	<u>(14,136)</u>
Decrease in profit before tax	<u>645</u>
Decrease in earning per share	<u>0.005</u>

Practical expedients applied

In applying IFRS 16 for the first time, the Company has used the following practical expedients permitted by the standard:

- the use of a single discount rate to a portfolio of leases with reasonably similar characteristics;
- reliance on previous assessments on whether leases are onerous as an alternative to performing an impairment review;
- the accounting for operating leases with a remaining lease term of less than 12 months as at January 1, 2019 as short-term leases; and
- the exclusion of initial direct costs for the measurement of the right-of-use asset at the date of initial application.

The Company has also elected not to reassess whether a contract is, or contains a lease at the date of initial application. Instead, for contracts entered into before the transition date the Company relied on its arrangement made applying IAS 17 for determining whether an arrangement contains a Lease.

4.2 Insurance / Takaful contracts**Conventional Business**

Insurance contracts represent contracts with policy holders and reinsurers.

Those contracts including riders where the Company (the insurer) accepts significant insurance risk from another party i.e. group and individual policyholders by agreeing to compensate the policyholders if a specified uncertain future event (the insured event) adversely affects the policyholders are insurance policy contracts.

Those insurance contracts that are issued by one insurer (the reinsurer) to compensate another insurer (the cedant) for losses on one or more contracts issued by the cedant are reinsurance contracts. The Company enters into reinsurance contracts with foreign reinsurers in the normal course of business in order to limit the potential for losses arising from certain exposures.

Once a contract has been classified as an insurance contract, it remains an insurance contract for the remainder of its period, even if the insurance risk reduces significantly during this period, unless all rights and liabilities are extinguished or expired.

Some of these riders are charged through deduction from policyholders' fund value, while others are conventional i.e., additional premium is charged there against. This business is written through direct sales force as well as bancassurance.

Takaful Business

The takaful contracts are based on the principles of Wakala Waqf Model. Takaful is a programme based on Shariah compliant, approved concept funded on the principles of mutual cooperation, solidarity and brotherhood. The obligation of Waqf for Waqf participants' liabilities is limited to the amount available in the Waqf fund. In the event where there are insufficient funds in Waqf to meet their current payments less receipts, the deficit is funded by way of an interest free loan (Qard-e-Hasna) from the operators' sub fund to the statutory fund (Takaful Business Statutory Funds). The amount of Qard-e-Hasna is refundable to the operators' sub fund.

The plans offer investment choices to the customer to direct their investment related contribution based on their risk / return objectives. No investment guarantees are offered. The investment risk is borne by the participants. Various type of supplemental benefits (accidental death, disability, income benefit, etc) are also sold along with basic policies.

4.7 Investments

4.7.1 Classification

Investments with fixed or determinable payments and fixed maturity, where the Company has positive intent and ability to hold to maturity, are classified as Held-to-Maturity. Investments designated at fair value through profit or loss represent investments acquired principally for the purpose of generating profits from short term fluctuations in market prices, interest rate movement, or dealer's margin. Available for sale investments are those investments that do not fall under either fair value through profit or loss or held to maturity categories.

4.7.2 Initial recognition

All investments are initially recognised at cost, being the fair value of the consideration given and includes transaction costs except for investments designated at fair value through profit or loss in which transaction cost is charged to profit and loss account.

4.7.3 Subsequent measurement

Held to maturity

Subsequently, these are measured at amortised cost less provision for impairment, if any. Any premium paid or discount availed on acquisition of held to maturity investment is deferred and amortised over the term of investment using the effective interest method.

Available-for-sale

Investments classified as available-for-sale are subsequently measured at market value in accordance with the requirements of the Insurance Accounting Regulations, 2017 and the unrealised gain or loss is recognised in other comprehensive income.

Fair value through profit and loss

Investments classified 'at fair value through profit or loss' category at inception, are subsequently measured at their fair value and gains and losses arising from changes in fair value are included in the profit and loss account.

Fair / market value measurement

For investments in government securities, fair / market value is determined by reference to quotations obtained from Financial Market Association of Pakistan (FMAP) (PKRV) where applicable. The fair / market value of mutual fund units and listed equity securities is determined as per the rates announced by the Mutual Funds Association of Pakistan (MUFAP) and Pakistan Stock Exchange (PSX) respectively.

Date of recognition

Regular way purchases and sales of investments that require delivery within the time frame established by regulation or market convention are recognised at the trade date. Trade date is a date on which a trade (bonds, equities, foreign exchange, commodities, etc.) is executed i.e. the day when transaction is entered into.

4.10 Taxation

Income tax comprises current and deferred tax. Income tax expense is recognised in the profit and loss account except to the extent that it relates to the items recognised directly in equity in which case it is recognised in equity.

4.10.1 Current

Provision of current tax is based on the taxable income for the year determined in accordance with the prevailing laws for taxation of income. The charge for current tax is calculated using prevailing tax rates or tax rates expected to apply to the profit for the year, if enacted. The charge for current tax also includes adjustments, where considered necessary, to provision for tax made in previous years arising from assessments finalised during the current year for such years.

4.10.2 Deferred

Deferred tax is accounted for using the balance sheet method in respect of all temporary differences at the reporting date between the tax bases and carrying amounts of assets and liabilities for financial reporting purposes. Deferred tax liabilities are generally recognised for all taxable temporary differences and deferred tax assets are recognised to the extent that it is probable that taxable profits will be available against which the deductible temporary differences, unused tax losses and tax credits can be utilised.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the period when the asset is realised or the liability is settled, based on the tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date. Deferred tax is charged or credited in the profit and loss account, except in the case of items credited or charged to equity in which case it is included in equity.

4.11 Fixed assets**4.11.1 Tangible**

These are initially stated at cost and subsequently at cost less accumulated depreciation and impairment losses, if any. Depreciation is charged over the estimated useful life of the asset on a systematic basis to income applying the straight line method at the rates specified in note 5.1 to the financial statements, after taking into account residual value and charged to profit and loss account.

Depreciation on additions is charged from the month in which the asset is available for use and on disposal, upto the month the asset is in use.

Subsequent costs are included in the assets' carrying amount or recognised as a separate asset, as appropriate, only when it is probable that the future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. Maintenance and normal repairs are charged to profit and loss account.

An item of tangible asset is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the profit and loss account in the year the asset is derecognised.

The assets residual values, useful lives and depreciation methods are reviewed, and adjusted if appropriate, at each reporting date.

4.11.2 Right-of-use assets and their related lease liability**Right-of-use assets**

On initial recognition, right-of-use assets are measured at an amount equal to initial lease liability adjusted for any lease payments made at or before the commencement date, plus any initial costs incurred and an estimate of costs to be incurred to dismantle and remove the underlying asset or the site on which it is located.

Right-of-use assets are subsequently stated at cost less any accumulated depreciation / accumulated impairment losses and are adjusted for any remeasurement of lease liability. The remeasurement of lease liability will only occur in cases where the terms of the lease are changed during the lease tenure.

Right-of-use assets are depreciated over their expected useful lives using the straight-line method. Depreciation on additions (new leases) is charged from the month in which leases are entered into. No depreciation is charged in month in which the leases mature or are terminated.

Lease liability against right-of-use assets

The lease liabilities are initially measured as the present value of the remaining lease payments, discounted using the interest rate implicit in the lease, or if that rate cannot be readily determined, the Company's incremental borrowing rate.

The lease liability is subsequently measured at amortised cost using the effective interest rate method. The lease liability is also measured to reflect any remeasurement or change in lease terms. These remeasurement of lease liabilities are recognised as adjustments to the carrying amount of related right-of-use assets after the date of initial recognition.

Each lease payment is allocated between a reduction of the liability and a finance cost. The finance cost is charged to the statement of comprehensive income as financial charges over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period.

4.11.3 Capital work in progress

Capital work in progress is stated at cost less any impairment in value. It includes advances to suppliers in respect of tangible fixed assets.

4.11.4 Intangible

These are stated at cost less accumulated amortisation and impairment loss, if any. Amortisation is charged over the estimated useful life of the asset on a systematic basis to income applying the straight line method at the rates specified in note 6 to the financial statements.

Amortisation on additions is charged from the month in which the asset is acquired or capitalised and on disposal up to the month the asset is in use.

Software development costs are only capitalised to the extent that future economic benefits are expected to be derived by the Company.

4.12 Impairment of non-financial assets

The carrying amount of assets (other than deferred tax asset) are reviewed at each reporting date to determine whether there is any indication of impairment of any asset or group of assets. If such indication exists, the recoverable amount of the asset is estimated. An impairment loss is recognised whenever the carrying amount of an asset exceeds its recoverable amount. Impairment losses are recognised in profit and loss account, as appropriate. An impairment loss is reversed if the reversal can be objectively related to an event occurring after the impairment loss was recognised.

4.13 Provisions

A provision is recognised when the Company has a legal or constructive obligation as a result of past events, it is probable that an outflow of economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

4.14 Investment income

- Income from held to maturity / available for sale investments is recognised using effective interest method. The difference between the redemption value and the purchase price of the held to maturity investments is amortised over the term of the investment and is taken to the profit and loss account.
- Dividend income on investments is recognised when the Company's right to receive the payment is established.
- Gain or loss on sale of investments is included in profit and loss account.
- Return on bank deposits, loans to employees and loans to policyholders are recognised on a time proportionate basis taking into account the effective yield.
- Revaluation gain / loss on investments held 'at fair value through profit or loss' is recognised as income / expense in the profit and loss account.

4.15 Earnings per share

The Company presents basic and diluted earnings per share (EPS) for its shareholders. Basic EPS is calculated by dividing the profit or loss attributable to the ordinary shareholders of the Company by the weighted average number of ordinary shares outstanding during the year. 20 RETIREMENT BENEFIT OBLIGATIONS**20.1 DEFINED BENEFIT PLAN - GRATUITY FUND**

The Company offers an approved gratuity fund for all eligible employees. Annual contributions are made to the fund on the basis of actuarial recommendations. The gratuity scheme is governed under the Trust Act, 1882, Trust Deed and Rules of the Fund, the Companies Act, 2017, the Income Tax Ordinance, 2001 and the Income Tax Rules, 2002.

The Company faces the following risks on account of gratuity fund:

Final salary risks

The risk that the final salary at the time of cessation of service is greater than what was assumed. Since the benefit is calculated on the final salary, the benefit amount would also increase proportionately.

Asset volatility

Most assets are invested in risk free investments. However, investments in shares, are subject to adverse fluctuation as a result of change in market price.

Discount rate fluctuation

The plan liabilities are calculated using a discount rate set with reference to corporate bond yields. A decrease in corporate bond yields will increase plan liabilities, although this will be partially offset by an increase in the value of the current plan's bond holdings.

Investment risks

The risk of the investment underperforming and not being sufficient to meet the liabilities. The risk is mitigated by closely monitoring the performance of investments.

Mortality risks

The risk that the actual mortality experience is different. The effect depends on the beneficiaries' service / age distribution and the benefit.

Withdrawal risks

The risk of higher or lower withdrawal experience than assumed. The final effect could go either way depending on the beneficiaries' service / age distribution and the benefit.

20.2 Valuation results

Actuarial valuation is carried out every year and the latest valuation was carried out as at December 31, 2019. b) Discount rate	11.75%	13.25%

Particulars	Change in assumption	2019		2018		
		Increase / (decrease) in present value of defined benefit obligation		Increase / (decrease) in present value of defined benefit obligation		
		(%)	Rupees in '000	(%)	Rupees in '000

	-1%	-34.83%	(27,991)	-1%	-49.11%	(32,938)

The above sensitivity analysis are based on a change in an assumption while holding all other assumptions constant. In practice, this is unlikely to occur, and changes in some of the assumptions may be correlated. When calculating the sensitivity of the defined benefit obligation to significant assumptions, same method (present value of the defined benefit obligation calculated with the projected unit credit method at the end of the reporting period) has been applied as when calculating the gratuity liability.

20.11 Plan assets comprise of the following:

	2019 (Rupees '000)	Percentage composition	2018 (Rupees '000)	Percentage composition
Cash and bank balances	26,650	100.00%	14,760	33.46%
Government Securities	-	-	29,348	66.54%
Fair value of plan assets	26,650	100.00%	44,108	100.00%

20.12 As per the actuarial recommendations, the expected return on plan assets was taken as 9% (2018: 9%), which is representative of yields on long-term government bonds.

20.13 Based on actuarial advice, the Company intends to charge an amount of Rs. 13.436 million in the financial statements for the year ending December 31, 2020.

20.14 Expected maturity analysis of undiscounted defined benefit obligation for the gratuity scheme is as follows:

23.1 The Finance Act, 2008 had introduced an amendment to the Workers' Welfare Fund Ordinance, 1971 (WWF Ordinance) as a result of which it was construed that all industrial establishments whose income exceeded Rs. 0.5 million in a tax year were brought within the scope of the WWF Ordinance, thus rendering them liable to pay contribution to WWF at the rate of two percent of their accounting or taxable income, whichever was higher. In light of this, the Company filed a constitutional petition in the Honourable Sindh High Court (SHC) challenging the applicability of WWF which is pending adjudication. However, these decisions were challenged in the Supreme Court of Pakistan.

On November 10, 2016 the Supreme Court of Pakistan (SCP) passed a judgment declaring the amendments made in the Finance Acts 2006 and 2008 pertaining to WWF as illegal citing that WWF was not in the nature of tax and could, therefore, not have been introduced through money bills. Accordingly, the aforesaid amendments were struck down by the SCP. The Federal Board of Revenue filed a petition in the SCP against the said judgment, which is pending hearing. While the petitions filed on the matter are still pending before the SHC, the Company has taken legal and tax opinions on the impact of the SCP judgment on the petition before the SHC. Both legal and tax advisors consulted were of the view that the judgment has removed the very basis on which the demands were raised against the Company. Therefore, there was no longer any liability against the Company under the WWF Ordinance and that all cases pending in the SHC or lower appellate forums will now be disposed off in light of the earlier judgment of the SCP.

In the current year, based on the facts above and the advice sought from tax consultants, the management of the Company decided to reverse the provision against WWF amounting to Rs 14.554 million.

25 CONTINGENCIES AND COMMITMENTS

25.1 With effect from November 1, 2018, the Punjab Revenue Authority (PRA), withdrew the exemption on both, life and health insurance, and subjected the same to the levy of Punjab Sales Tax (PST). Previously, the Sindh Revenue Board (SRB) had withdrawn similar exemptions granted in Sindh. However, during 2019, the Sindh Revenue Board, vide notification no. SRB 3-4/5/2019 dated May 8, 2019, restored the exemption on both, life and health insurance business upto June 30, 2019.

With effect from July 1, 2019, in Sindh, the SRB extended the exemption to health insurance upto June 30, 2020, and for individual life insurance, prescribed a reduced rate of 3% on GWP. The exemption to Group Life insurance lapsed on June 30, 2019. Hence, Group Life Insurance was made taxable at the full rate of 13%.

This being a collective issue of the industry, the Insurance Association of Pakistan (IAP) had taken up the matter extensively with PRA and SRB for restoration of the exemptions that were withdrawn, besides seeking legal advice. The legal advisors of the IAP/Company have confirmed the contention of the Company that insurance is not a service, but infact, in sum and substance, a contingent contract under which payment is made on the occurrence of an event, specified in the terms of contract or policy, and is thus a financial arrangement. Superior courts in foreign jurisdictions have held that insurance is not a service.

The legal advisors have also raised the important question of constitutionality of the levy of provincial sales tax on life insurance, which is a Federal subject, and have expressed the view that under Article 142 of the Constitution of Pakistan, only those matters which are not enumerated in the Federal Legislative List, may be legislated upon by the provinces. In their view, since the Federation has retained a legislative mandate over all laws relating to insurance, therefore, only the Federation is entitled to levy any tax in relation to insurance business

Without prejudice to the main contentions as stated above, even otherwise, the legal advisors have expressed in their opinion a further flaw in the context of the manner in which the entire premium payment, i.e. Gross Written Premium (GWP) is being charged to the levy of provincial sales tax. This is despite the fact that there are two distinct elements of GWP (i) the amount allocated towards the policy holders' investment, which belongs to them and (ii) the difference between the GWP charged and the investment amount allocated. Thus, in their view, if the entire GWP is subjected to provincial sales tax, then this is akin to a direct tax on policy holders, in the nature of income tax, wealth tax, or capital value tax, all of which fall exclusively within the domain of Federal Legislature.

Based on the above contentions, the Company and other life insurance / health insurance companies challenged the levy of PST on life and health insurance in the Punjab through a writ petition in the Hon'ble Lahore High Court (LHC) in September 2019. Subsequent to the filing of the petition, in October 2019, the PRA issued a show cause notice to the Company and other life insurance companies, attempting to levy PST on the Pan Pakistan GWP, i.e. beyond their jurisdiction, and for the entire calendar year 2018, besides other inaccuracies. The Company and other life insurance companies have filed further Writ Petitions in the Honourable Lahore High Court against the same. The petition is pending adjudication.

In Sindh, extensive discussions were held at the collective level of IAP with the SRB for the restoration of exemption on life insurance, which remained inconclusive. In November 2019, the Company, and other life insurance companies received show cause notices from the SRB, requiring the companies to deposit the SST on life insurance. Based on the same contentions as PST, the Company and other life insurance companies, have filed a Petition in the Hon'ble Sindh High Court (SHC) in November 2019, challenging the levy of SST. The Hon'ble SHC, in their interim order dated December 2, 2019, directed that the request of the petitioners, seeking exemption in terms of Section 10 of the SST Act, 2011, shall be considered by the SRB in accordance with the law. The Petition is pending adjudication.

In January 2020, the SRB, PRA and BRA invited the IAP and insurance industry to hold a dialogue for an amicable settlement of the matter. The Company, along with the IAP and other insurance companies participated in the meeting convened by Chairman SRB, and will continue its efforts to convince the provincial revenue authorities about the merits of the case.

The legal advisors, in their opinion, have expressed the view that the Company has a reasonably strong case on the merits of the Petitions filed in both, the Hon'ble LHC and Hon'ble SHC, against the imposition of the provincial sales taxes on life and health insurance in the Punjab, and on life insurance in Sindh.

Had the sales tax liability on life insurance and health insurance premium been recorded, the loss after tax and loss per share would have been higher by Rs. 130.154 million and Rs. 0.95 respectively while sales tax liability as at December 31, 2019 would have been higher by Rs. 183.315 million.

42 MANAGEMENT OF INSURANCE AND FINANCIAL RISK

The Company issues contracts that transfer insurance risk or financial risk or both. This section summarises these risks and the way the Company manages them.

42.1 Insurance risk**42.1.1 Individual Life (Unit Linked Policies, Universal Life Policies and Traditional Policies)**

This section discusses the exposure of insurance risk to the Company under Life Participating, Life Non-participating and Investment Linked statutory funds and the process adopted by the Company to manage these risks.

The risk underwritten is mainly death and sometimes disability and/or critical illness. The risk of death and disability will vary from region to region. The Company may get exposed to poor risks due to:

- Unexpected experience in terms of claim severity or frequency. This can be a result of anti-selection, fraudulent claims, a catastrophe or poor persistency.
- Additionally, the risk of poor persistency may result in the Company being unable to recover expenses incurred at policy acquisition.

The Company manages these risks through its:

- Pricing:

All products of this nature are designed by the Actuarial Department along with input from relevant sales team members. Profit testing is conducted for all new products and it is also reviewed by the Appointed Actuary. Embedded value analysis is conducted on a quarterly basis to ensure reasonableness of premiums charged. Additionally, the Company reserves the right to review the charges deductible under the contracts, thus limiting the risk of underpricing.

- Underwriting:

Adequate underwriting policies and controls have been put in place which cover various aspects like health, location, nature of work of the insured etc. before issuance of policy. Appropriate underwriting authority limits have been assigned to individual underwriters by the underwriting committee. Furthermore, Underwriting & Reinsurance Committee reviews the underwriting performance of the Company on a quarterly basis.

- Reinsurance:

Company has entered into both excess of loss and quota share reinsurance agreements covering its individual life products and supplementary riders. Since the Company has liaison with the best reinsurers in the world, it does not only limit the insurance risks but also the credit risk associated with them. Underwriting & Reinsurance Committee reviews, every quarter, the performance of the treaties to ensure that sound reinsurance arrangements are in place.

- Claims handling policy:

The Company through its claims-handling policies has procedures and controls in place to ensure that payment of fraudulent claims is avoided. Detailed investigation of all material and doubtful claims is conducted. Moreover, Claims Committee has assigned claims process authority limits for processing of claims. Claims Committee meets on a quarterly basis to review the claims department's performance and ensures that adequate claims controls are in place.

- Persistency:

The Company applies controls to curb mis-selling to customers. Persistency for each product, branch and partner bank is closely monitored by the Company and remedial actions are taken immediately upon identifying when persistency level for a distribution channel drops below a certain threshold. Continuous efforts are made to increase and/or maintain the persistency levels for all distribution channels.

a) Frequency and severity of claims

The Company measures concentration of risk by its exposure to catastrophic events. Concentration of risk as a result of geographical area is not a factor of concern due to spread of risks across different parts of the country. To mitigate risk accumulation resulting from catastrophic events, the Company maintains a catastrophe reinsurance cover which ensures that the Company's liability in respect of catastrophic events remains within reasonable limits.

In order to cover its mortality risk, the Company makes adequate deductions from the insurance contracts. The Company manages these risks through its systematic underwriting processes and adequate reinsurance arrangements.

The table below presents the concentration of insured benefits across five bands of insured benefits per individual life assured. The benefit insured figures are shown gross and net of the reinsurance contracts described above.

The amounts presented are showing total exposure of the Company including exposure in respect of riders attached to the main policies.

b) Sources of uncertainty in the estimation of future benefit payments and premium receipts

Uncertainty in the estimation of future benefit payments and premium receipts for long term unit linked and universal life insurance contracts arises from the unpredictability of long-term changes in overall levels of mortality and variability in policyholder's behavior (this primarily impacts persistency).

For this purpose, the Company carried out a Liability Adequacy test, details are provided below, and it was found that the recognised liabilities are adequate and no further provision is required.

c) Process used to decide on assumptions

- **Mortality:** The expected mortality is assumed at 85% of 1975-80 US SOA Select and Ultimate Mortality Table.
- **Persistency:** A periodic analysis of the Company's recent and historic experience is performed and persistency is calculated by applying statistical methods. Persistency rates vary by products and more importantly the sales distribution channel.

- **Expense levels and inflation:** A periodic study is conducted on the Company's current business expenses and future projections to calculate per policy expenses. Expense inflation is assumed in line with assumed investment return.
- **Investment returns:** The investment returns assumptions are based on assets backing the portfolio.

- Liability Adequacy Test

Liability adequacy test is applied in order to ensure that the liability calculated using conservative assumptions is sufficient in comparison to the liability determined using best estimate assumptions.

To determine the adequacy of liabilities, assumptions must be based on realistic best estimates. Company used EFU (61-66) mortality table to determine the conservative liabilities. Since the data is insufficient to conduct a detailed mortality study, Company believes that SLIC (2001-05) table better reflects the mortality rates in Pakistan.

The investment return assumed for valuation is 3.75% per annum. This rate is prescribed by law. On a more realistic basis, for Conventional line of business, Company expects to earn a long term return of 12.50% based on Pakistan Investment Bond (PIB) rates as at December 31, 2019. For Takaful line of business, Company expects to earn 14.30%, which is based on the 3-Month KIBOR rate as on December 31, 2019 plus 100bps. Liabilities are also determined on this rate of return assumption for Liability Adequacy Test.

The table below shows the liability held as at December 31, 2019 and the liability determined through best estimate assumptions:

	Liability Held as at December 31, 2019	Best Estimate Liability
	-----Rupees-----	
Mortality	16,485,783,709	16,464,494,906
Investment	16,485,783,709	16,405,313,060

Liability adequacy shows that the liability held as at December 31, 2019 is adequate in comparison to the best estimate liability.

d) Change in Assumptions

There has been no material change in assumptions.

42.1.2 Group Life

The main risk written by the Company under the Group Life business is mortality. The Company is exposed to the risk of unexpected claim severity or frequency. This can be a result of writing business with higher than expected mortality (such as mining or other hazardous industries), writing high cover amounts without adequate underwriting, and difficulty of verification of claims, fraudulent claims or a catastrophe. The Company also faces risk such as that of underpricing to acquire business in a competitive environment and of non-receipt of premium in due time.

The Company manages these risks through its:

- Pricing and Underwriting:

All products of this nature are prepared by the Group Underwriting Department along with input from relevant sales team members which is then reviewed by the Appointed Actuary.

Pricing is done in line with the actual experience of the Company. The premium charged takes into account the actual historical experience as well as the future expected mortality, considering various characteristics of the client.

At the same time, due caution is applied in writing business in areas of high probability of terrorism. The Company ensures writing business with good geographical spread and tries to maintain a controlled exposure to large groups which generally have poor exposure.

Also, Underwriting and Reinsurance Committee reviews the underwriting performance of the Company on a quarterly basis and tracks the adequacy of premium charged.

- Reinsurance:

Reinsurance agreements are in place to limit the mortality risk exposure. The Company also has a catastrophe cover reinsurance agreement covering group life business. Underwriting & Reinsurance Committee reviews every quarter the performance of the treaties.

- Claims handling policy:

The Company through its claims-handling policies has procedures and controls in place to ensure that payment of any fraudulent claims is avoided. Detailed investigation of all material and doubtful claims is conducted. Moreover, Claims committee has assigned claims process authority limits for processing of claims. Claims committee meets on a quarterly basis to review the claims departments' performance and ensures that adequate claims controls are in place.

a) Frequency and severity of claims

The Company has a good spread of business throughout the country thereby ensuring diversification across geographical regions. However, there still is a risk accumulation resulting from catastrophic events which the company mitigates through a catastrophe reinsurance cover.

The following table presents the concentration of insured benefits across six bands of insured benefits per individual life assured. The benefit insured figures are shown gross and net of the reinsurance contracts described above.

The amounts presented are showing total exposure of the Company including exposure in respect of riders attached to the main policies.

Total	337,632,864	100.00%	277,102,825	100.00%

b) Sources of uncertainty in the estimation of future benefits payments and premium receipts

Other than conducting a liability adequacy for unearned premium reserve, there is no need to estimate mortality for future years because of the short duration of the contracts.

c) Process used to decide on assumptions

Where data is sufficient to be statistically credible, the statistics generated by the data is assigned appropriate credibility factors to account for the group's experience.

d) Changes in assumptions

There has been no material change in assumptions.

e) Sensitivity analysis

The table below shows the level of respective variation in liabilities for change in each assumption while holding all other assumptions constant.

	Change in variable	Increase in Liability 2019 Rupees in '000

Increase in reporting lag	10%	3,081,991

42.1.3 Accident & Health

The products in this fund provide cover against accidental death, disability, sickness and critical illness and are mainly offered as yearly renewable plans. The Company may be exposed to the risk of unexpected claim severity or frequency. This can be a result of fraudulent claims and catastrophic event.

The Company manages these risks through its:

- Pricing and Underwriting:

Products of this nature are prepared by the Actuarial department along with input from relevant sales team members which is then reviewed by the Appointed Actuary.

Pricing is done after analysing the actual experience of the Company as well as future expectations. The rates are certified by the Appointed Actuary.

Also, Underwriting Committee reviews the underwriting performance of the Company on a quarterly basis.

- Claims handling policy:

The Company has procedures in place to ensure that payment of any fraudulent claims is avoided. Detailed investigation of all material and apparently doubtful claims is conducted.

- Reinsurance:

The Company has reinsurance arrangement in place covering A&H business; the treaty's results are reviewed by the Underwriting and Reinsurance Committee on a quarterly basis.

a) Frequency and severity of claims

The Company measures concentration of risk by its exposure to catastrophic events. Concentration of risk arising from geographical area is not a factor of concern due to spread of risks across various parts of the country.

42.1.4 Management of takaful risk and financial risk

The Company is responsible for managing contracts that result in the transfer of Takaful and Financial Risk from the Participant to the respective PTF. This section summarises the risks and the way the Company manages them, as part of the Company's Window Takaful Operations.

Takaful Risk

The PTF issues Takaful contracts that are classified in the following segments:

- Individual Family Takaful
- Group Family Takaful
- Group Health Takaful

42.1.4.1 Individual Family Takaful

These risks are managed along similar lines as explained for individual life unit linked and universal life business.

a) Frequency and severity of claims

Concentration of risk is not a factor of concern due to spread of risks across various parts of the country. However, undue concentration by amounts could have an impact on the severity of benefit payments on a portfolio basis. However, a risk of concentration of risk on any one Participant of the PTF still exists. The Company caters to this risk by entering into suitable Retakaful arrangements. The Company charges for mortality risk (credited to the PTF) on a monthly basis for all Takaful contracts without fixed term.

Moreover, the Company manages these risks through its underwriting strategy and the results are revised quarterly by the Underwriting and Reinsurance Committee.

The table below presents the concentration of covered benefits across five bands of benefits covered. The benefit covered figures are shown gross and net of the retakaful contracts described above.

The amounts presented are showing total exposure of the PTF including exposure in respect of riders attached to the main membership.

Total	12,697,162	100.00%	5,384,046	100.00%

b) Source of uncertainty in the estimate of future benefits payments and contributions receipts

Uncertainty in the estimation of future benefit payments and contribution receipts for long term takaful contracts arises from the unpredictability of long-term changes in overall levels of mortality and variability in participants' behavior (this primarily impacts persistency).

c) Process used to decide on assumptions

- Mortality: The expected mortality is assumed at 85% of 1975-80 US SOA Select and Ultimate Mortality Table.
- Persistency: A periodic analysis of the Company's recent and historic experience is performed and persistency is calculated every month. Persistency rates vary by products and more importantly the sales distribution channel.
- Expense levels and inflation: A periodic study is conducted on the Company's current business expenses and future projections to calculate per membership expenses. Expense inflation is assumed in line with assumed investment return.
- Investment returns: The investment returns assumptions are based on the assets backing the portfolio.

d) Changes in assumptions

There has been no change in assumptions.

42.1.4.2 Group Life Family Takaful

The main risk written by the Company is mortality. The Company may be exposed to the risk of unexpected claim severity or frequency. This can be a result of writing business with higher than expected mortality (such as mining or other hazardous industries), writing high cover amounts without adequate underwriting, and difficulty of verification of claims, fraudulent claims or a catastrophe. The Company also faces risk such as that of under-pricing to acquire business in a competitive environment and of non-receipt of contribution in due time.

The Company manages these risks through its:

a) Pricing and Underwriting:

All products of this nature are prepared by the Group Underwriting Department along with input from relevant sales team members which is then reviewed by the Appointed Actuary.

Pricing is done in line with the actual experience of the Company. The contribution charged takes into account the actual experience of the client and the nature of mortality exposure the group faces.

At the same time, due caution is applied in writing business in areas of high probability of terrorism. The Company ensures writing business with good geographical spread and tries to maintain a controlled exposure to large groups which generally have poor exposure.

Furthermore, the Company also maintains various MIS that are shared with relevant management to track the adequacy of the contribution charged.

Also, Underwriting & Reinsurance Committee reviews the underwriting performance of the Company on a quarterly basis.

b) Retakaful:

Retakaful agreements are in place to limit the mortality exposure. Underwriting & Reinsurance Committee reviews every quarter the performance of the treaties to ensure that adequate retakaful coverage is in place.

c) Claims handling policy:

The Company has procedures in place to ensure that payment of any fraudulent claims is avoided. Detailed investigation of all material and apparently doubtful claims is conducted. Moreover, Claims committee has assigned claims process authority limits for processing of claims. Claims committee meets on a quarterly basis to review the claims department's performance and to make sure that adequate claims controls are in place.

d) Frequency and severity of claims:

The Company measures concentration of risk by its exposure to catastrophic events. Concentration of risk arising from geographical area is not a factor of concern due to spread of risks across various parts of the country. To mitigate risk accumulation resulting from catastrophic events, the Company maintains a catastrophe excess of loss retakaful agreement which protects the waqf fund from exposure to the catastrophic events.

The concentration of risk for these policies is mentioned in note 42.1.4.4.

42.1.4.3 Group Health Takaful

The main risk written by the Company is morbidity. The Company may be exposed to the risk of unexpected claim severity or frequency. This can be a result of high exposure in a particular geographical region, medical expense inflation, fraudulent claims and catastrophic event. The Company potentially faces the risk of lack of adequate claims control (such as for very large groups). The Company also faces a risk of under-pricing to acquire business in a competitive environment and of non-receipt of contribution in due time.

The Company manages these risks through its:

a) Pricing and Underwriting:

Products of this nature are prepared by Group Underwriting Department along with input from relevant sales team members and Actuarial Department which is then reviewed by the Appointed Actuary.

Pricing is done in line with the actual experience of the Company. The contribution charged takes into account the actual experience of the client and the nature of mortality and morbidity exposure the group faces. The rates are certified by the Appointed Actuary for large groups.

At the same time, due caution is applied in writing business in areas of high probability of terrorism. The Company ensures writing business with good geographical spread and tries to maintain a controlled exposure to large groups which generally have poor exposure.

Furthermore, the Company also maintains various MIS that are shared with relevant management to track the adequacy of the contribution charged.

Also, Underwriting & Reinsurance Committee reviews the underwriting performance of the Company on a quarterly basis.

b) Claims handling policy:

The Company has procedures in place to ensure that payment of any fraudulent claims is avoided. Detailed investigation of all apparently doubtful claims (particularly of high amounts) is conducted. Also, the claims are reviewed and managed by technical staff and doctors while an on-site monitoring and checking is performed.

The Company has pre-determined charges for certain illnesses with its panel hospitals, and to keep a check on medical inflation, it continues to negotiate these rates. The portfolio has a spread across various geographical regions. On the claims handling side, the Company ensures that payment of any fraudulent claims is avoided.

Moreover, Claims committee has assigned claims process authority limits for processing of claims. Claims committee meets on a quarterly basis to review the claims department's performance and make sure that adequate claims controls are in place.

c) Concentration Risk:

The Company has a good spread of business throughout the country thereby ensuring diversification across geographical regions.

d) Frequency and severity of claims

The Company measures concentration of risk by its exposure to catastrophic events. Concentration of risk arising from geographical area is not a factor of concern due to spread of risks across various parts of the country.

Increase in claims severity due to medical inflation is a risk which is being strictly monitored by the Company through annual claims studies and trend analysis. Such trend analysis is also incorporated in Group Health takaful pricing.

e) Sources of uncertainty in the estimation of future benefits payments and contribution receipts

Other than conducting a liability adequacy for unearned contribution reserve, there is no need to estimate mortality for future years because of the short duration of the contracts.

f) Process used to decide on assumptions

Where data is sufficient to be statistically credible, the statistics generated by the data is assigned appropriate credibility factors to account for the group's experience.

An investigation into group's experience is performed periodically, and statistical methods are used to adjust the rates to a best estimate of morbidity. Where data is sufficient to be statistically credible, the statistics generated by the data are assigned appropriate credibility factors to account for the group's experience.

g) Changes in assumptions

There has been no material change in assumptions.

42.1.4.4 Concentration of insurance risk

A concentration of risk may arise from a single insurance contract issued to a particular type of policyholder, within a geographical location or to types of commercial business. The Company minimises its exposure to significant losses by obtaining reinsurance from foreign reinsurers.

To optimise benefits from the principle of average and law of large numbers, geographical spread of risk is of extreme importance. There are a number of parameters which are significant in assessing the accumulation of risks e.g. financial underwriting ensuring a reasonable relationship between the income and insurance amount of insured, determination of insurance amount through some mechanism which precludes individual choices and anti-selection.

The concentration of risk by type of contracts is summarised below by reference to liabilities.

The Board of Directors of the Company has overall responsibility for the establishment and oversight of the Company's risk management framework. The Company has exposure to the following risks from its use of financial instruments:

- Credit risk
- Liquidity risk
- Market risk
- Foreign currency risk

Risk management framework

The Board meets frequently throughout the year for developing and monitoring the Company's risk management policies. The Company's risk management policies are established to identify and analyse the risks faced by the Company, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Company's activities. The Company, through its training and management standards and procedures, aims to develop a disciplined and constructive control environment in which all employees understand their roles and obligations.

The Audit Committee oversees how management monitors compliance with the Company's risk management policies and procedures, and reviews the adequacy of the risk management framework in relation to the risks faced by the Company. The Company's Audit Committee is assisted in its oversight role by Internal Audit function. Internal Audit undertakes both regular and adhoc reviews of risk management controls and procedures, the results of which are reported to the Audit Committee.

42.2.1 Credit risk

Credit risk is the risk that arises with the possibility that one party to a financial instrument will fail to discharge its obligation and cause the other party to incur a financial loss. The Company attempts to control credit risk by monitoring credit exposures by undertaking transactions with a large number of counterparties in various industries and by continually assessing the credit worthiness of counterparties.

42.2.1.1 Exposure to credit risk

Credit risk of the Company arises principally from the investments (except for government securities), premium due but unpaid, amount due from other insurers / reinsurers, reinsurance recoveries. To reduce the credit risk the Company has developed a formal approval process whereby credit limits are applied to its policyholders and other insurers / reinsurers. The management continuously monitors the credit exposure towards the policyholders and other insurers / reinsurers and makes provision against those balances considered doubtful of recovery.

The carrying amount of financial assets represent the maximum credit exposure, as specified below:

42.2.1.2 Fair value of financial instruments

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

Underlying the definition of fair value is the presumption that the Company is a going concern without any intention or requirement to curtail materially the scale of its operations or to undertake a transaction on adverse terms.

Fair value of investments is determined as follows:

- Fair value of listed equity securities is determined on the basis of closing market prices quoted on the Pakistan Stock Exchange.
- Fair value of mutual funds is determined on the basis of closing net assets value (NAV) per unit published by Mutual Fund Association of Pakistan (MUFAP).
- Fair values of Treasury Bills and Pakistan Investment Bonds are derived using the PKRV rates (Reuters page).
- The fair value of all other financial assets and financial liabilities of the Company approximate their carrying amounts due to short term maturities of these instruments.

42.2.1.3 Fair value hierarchy

International Financial Reporting Standard 13, 'Fair Value Measurement' requires the Company to classify assets using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

- Fair value measurements using quoted price (unadjusted) in an active market for identical assets or liabilities (Level 1)
- Fair value measurements using inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices) (Level 2).
- Fair value measurement using inputs for the asset or liability that are not based on observable market data (i.e. unobservable inputs) (Level 3).

As at December 31, 2019, the Company held the following financial instruments measured at fair value:

	As at December 31, 2019		
	Level 1	Level 2	Level 3
	----- Rupees in '000 -----

42.2.2 Liquidity risk

Liquidity risk is the risk that the Company will encounter difficulty in meeting its financial obligations as they fall due. Liquidity risk arises because of the possibility that the Company could be required to pay its liabilities earlier than expected or difficulty in raising funds to meet commitments associated with financial liabilities as they fall due. The Company's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation. The Company ensures that it has sufficient cash on demand to meet expected operational requirements. The Company also manages this risk by investing in deposit accounts that can be readily encashed. The following are the contractual maturities of financial liabilities, including interest payments and excluding the impact of netting agreements:

The following are the contractual maturities of financial liabilities:

	2019			2018

42.2.3 Market risk

Market risk is the risk that changes in market prices, such as foreign exchange rates, interest rates and equity prices will affect the Company's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return. All transactions are carried in Pak Rupees therefore, the Company is not exposed to any significant foreign exchange risk. The Company invests in government securities, debt securities, open ended mutual funds and listed equity securities which are accounted for at fair value, therefore the change in market prices does affect equity of the Company.

42.2.4 Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. Majority of the interest rate exposure arises from investment in government securities and balances held in profit and loss sharing accounts with reputable banks. At the reporting date the detailed interest rate profile of the Company's interest-bearing financial instruments is disclosed in note 42.2.4.1. The table below summarises Company's interest rate risk as of December 31, 2019 and 2018 and shows the effects of a hypothetical 1% increase and a 1% decrease in interest rates as at the year end.

پھیلاؤ کے اثر کو کم کرنے اور اس کے نتیجے میں حکومت کی جانب سے عائد کردہ لاک ڈاؤن کی وجہ سے باقاعدہ ریلیف دیا ہے۔ جس کے مطابق، کمپنی کی سالانہ رپورٹ برائے 2019 شیئر ہولڈرز کو بذریعہ ڈی یا جی پی ہوئی کا پیاں فراہم نہیں کی جائیگی بلکہ وہ صرف پاکستان اسٹاک ایکسچینج لمیٹڈ کے PUCARS سسٹم اور کمپنی کی ویب سائٹ (www.igilife.com.pk) پر الیکٹرانک طور پر دستیاب ہوگی۔ شیئر ہولڈرز جو کہ سالانہ رپورٹ 2019 بذریعہ ای میل وصول کرنا چاہیں تو ان سے درخواست ہے کہ کمپنی کو اپنا ای میل ایڈریس igilifeagm@igi.com.pk پر فراہم کر دیں۔

8- کمپنی ایکٹ 2017 کی دفعہ 242 کے تحت لسٹڈ کمپنی کیلئے ضروری ہے کہ کوئی بھی واجب الادا نقد منافع منقسمہ صرف برقی طریقہ کار کے مطابق براہ راست اہل شیئر ہولڈرز کے نامزد بینک اکاؤنٹ میں منتقل کی جائے۔ اپنے منافع منقسمہ کو براہ راست اپنے بینک اکاؤنٹ میں وصول کرنے کیلئے براہ کرم ای کریڈٹ ڈیوڈنڈ مینڈیٹ فارم میں تفصیلات مکمل کریں۔ ڈیوڈنڈ مینڈیٹ فارم سالانہ رپورٹ میں منسلک ہے اور ہماری کمپنی کی ویب سائٹ www.igilife.com.pk پر بھی اپ لوڈ کیا جا چکا ہے۔

کمپنی کو نقد منافع منقسمہ کی رقم پر 30 فیصد کی بجائے 15 فیصد کی شرح پر ٹیکس کٹوتی کرنے کے قابل بنانے کیلئے ایسے شیئر ہولڈرز جن کے ناموں کا اندراج ایف بی آر کی ویب سائٹ پر فراہم کردہ فعال ٹیکس دہندگان کی فہرست (اے ٹی ایل) میں موجود نہیں ہے۔ اس امر کے باوجود کہ وہ فائلرز ہیں، انہیں مشورہ دیا جاتا ہے کہ کمپنی کی کتب بندش ہونے سے قبل اپنے ناموں کا اے ٹی ایل میں اندراج کرائیں، بصورت دیگر ان کے نقد منافع منقسمہ پر ٹیکس کی کٹوتی 15 کی بجائے 30 فیصد کی شرح سے منہا کی جائے گی۔

ڈائریکٹر پورٹ برائے ممبران

کمپنی کے ڈائریکٹر نہایت مسرت کے ساتھ 31 دسمبر 2019ء کو ختم ہونے والے مالیاتی سال کے لئے کمپنی کی پچیسویں سالانہ رپورٹ بمعہ آڈیٹڈ مالیاتی بیانات پیش کرتے ہیں۔

سال 2019 ہماری کمپنی کے لئے اہم سال تھا جس نے ہمارے فلگ شپ پروڈکٹ 'Vitality' کو لانچ کیا ہے۔ اس پروگرام کا نام 'IGI Life Vitality' ہے۔ جو پینٹیلیٹی گروپ انٹرنیشنل کے اشتراک سے پیش کیا گیا ہے۔ یہ پروڈکٹ پالیسی ہولڈرز کی جسمانی سرگرمیوں کا بروقت ریکارڈ مرتب کرتے ہوئے انہیں مختصر اور طویل مدت کے انعامات کا حقدار قرار دیتا ہے جو کہ ہدف پورا کرنے پر منحصر ہے۔ ہمارا عزم ہے کہ Vitality کے ذریعے ہم صحت مند پاکستان کے لئے 'چست و چو بند لائف انشورنس' کو فروغ دیں۔

اس پروڈکٹ کے لئے نئے آئی ٹی سسٹم کے ساتھ ساتھ فرنیچر فیس کی ادائیگی اور تریلی بلٹ فارم کو بڑھانے کے لئے بڑی سرمایہ کاری کی ضرورت تھی۔ لہذا، کمپنی کے بورڈ آف ڈائریکٹرز نے 14 جون 2019ء کو ہونے والی میٹنگ میں ایک بلین روپے کے رائٹ ایٹو کی منظوری دی۔ ایکویٹی سے حاصل ہونے والے سرمایے کی وجہ سے کمپنی نے اتنی بڑی سرمایہ کاری کرنے کے باوجود بھی معقول سولوشن مارجن برقرار رکھا۔

کمپنی یقین رکھتی ہے کہ آنے والے سالوں میں اس کے حصص یافتگان اور پالیسی ہولڈروں کے لئے یہ ایک بہترین پروڈکٹ ہے۔

2019 کے دوران، مالیاتی خسارے، کرنسی کی قدر میں کمی، شرح سود میں اضافے اور پینٹیلیٹی کی بڑھتی ہوئی قیمتوں کی وجہ سے اسٹاک مارکیٹ غیر مستحکم رہی۔ 2019ء کے دوران فیکسڈ انکم کی جانب، اسٹیٹ بینک آف پاکستان نے پالیسی ریٹ 10 فیصد سے بڑھا کر 13.25 فیصد کر دیا۔ کنوینینس، ایگریسیو، ہیلسڈ، سیکور اور کنزرویٹو فنڈز نے اس سال کے دوران بالترتیب 11.69 فیصد، 12.05 فیصد، 13.50 فیصد اور 13.30 فیصد مجموعی سالانہ منافع کمایا ہے۔

ہنگامی مالی ذمہ داریاں

جیسا کہ نوٹ 25.1 میں ذکر کیا گیا ہے، انشورنس کے کاروبار پر موجود سیکورٹیز کا بغور جائزہ لینے کی ضرورت ہے تاکہ پاکستان میں لائف انشورنس کے بزنس میں پائیدار اور مستحکم ترقی ممکن ہو سکے۔ انشورنس ایسوسی ایشن آف پاکستان نے اسٹیجی کی تجدید سے متعلق معاملے کو سیکورٹیز اتھارٹیوں کے سامنے اٹھایا ہے۔ علاوہ ازیں، قانونی مشورے کی بنیاد پر، دیگر انشورنس کمپنیوں کے ساتھ مل کے ہماری کمپنی نے معاملے کو سندھ اور پنجاب ہائی کورٹ میں چیلنج کیا ہے جس کا فیصلہ زیر التوا ہے۔
