## Nature of Business

### Introduction

The Company is a pioneer in Pakistan's wires and cables industry. The Company is principally engaged in the manufacture of conductors, wires and cables for transmission and distribution of electricity since 1953. In 1979, the Company started extrusion of aluminium rod from billets, which was upgraded in 1984 to manufacture anodized aluminium profile sections for architectural applications. In 1996, the Company set up a state of the art plant to manufacture High Conductivity Oxygen Free (HCOF) Copper Rod. Due to the increased requirement of rods for manufacturing wire and cables as a result of growing customer demand, the production capacity of the plant has been regularly enhanced over recent years. In 2008, the Company set up a PVC Compounding Plant to manufacture high quality electric cable grade PVC compound. The Company also set up a 2-MW gas fired tri-generation Power Plant, allowing it to be mostly self-sufficient for its electricity needs.

### Industry

The Company is the only listed company in the cable industry, which comprises of a few large players, a handful of small localized producers and a growing percentage of imports. Within the cable industry, the prices of cables, copper rod and aluminium extrusions are closely linked to the global markets for copper and aluminium. Both base metals are traded on the London Metal Exchange (LME), the world's premier non-ferrous metals market. The price of both these metals is therefore determined at the LME and any fluctuations in copper or aluminium prices have a direct effect on the pricing of our products.

### Main Markets

The Company has established itself as a key player in the manufacturing sector with more than 65 years of experience in the wire and cables business. Our business is driven by the strength, growth prospects and activity in the end markets where our products are used. Our products are primarily used in projects of all kinds, including infrastructure, factories, commercial and residential construction. Cable and conductors are also used in the transmission and distribution of electricity by the country's utility companies. We manufacture an extensive array of world-class quality wires and cables to meet the diverse, dynamic and time-sensitive needs of our customers.

The Company aims to secure new avenues in the institutional and project sectors across the country which provide better territorial reach in the market. Efforts are being made to consolidate existing relationships in the market along with the creation of new ones.

### Business Model

- To continue to generate market awareness of our brand and educate the consumer about the benefits of cables and wires that are of the highest quality thereby remaining the customers' first preference;
- To identify profitable markets and optimal product mix and tailor our product offerings accordingly;
- To ensure that products are made easily available to the customer through our network of dealers, distributors, stockists and warehouses, and by providing optimal direct sales coverage (where relevant); and
- To penetrate targeted markets through cost benefit analysis and customized service offering.

### Legal Environment

Insofar it is registered and licensed by the Securities and Exchange Commission of Pakistan. The Company is also listed on the Pakistan Stock Exchange and is regulated by the PSX Rule Book and all circulars/notifications issued thereunder. The Company's trade network covers over 180 cities and towns across Pakistan and warehouses and power cable stockists in major cities of the country. Over the year, the company successfully won large orders from the projects segment in several areas including ports and shipping, cement, power and energy, airports and infrastructure, auto industry and with builders and developers. Moreover, the Company was successful in winning selective tenders from utility companies and won export orders from various customers.

## Chairman's Review

It is my pleasure to present this report to the shareholders of the Company pertaining to the overall performance of the Board of Directors and their effectiveness in guiding the Company towards accomplishing its aims and objectives.

The Company has implemented a strong governance framework that supports an effective and prudent management of business matters, which is regarded as instrumental in achieving the long term success of the Company.

During the course of the financial year 2018-2019, the Board and its Sub-Committees worked with a marked level of diligence and proficiency to best advise and guide the Company towards achieving its potential in the face of a significantly challenging economic scenario with the country experiencing one of the worst currency devaluations in its history, alongside inflationary pressures and escalating interest rates.

The Board as a whole has reviewed the Annual Report and Financial Statements, and is pleased to confirm that in its view the Annual Report and the Financial Statements, taken as a whole, are fair, balanced and comprehensive.

An annual self-assessment is carried out to determine the effectiveness and performance of the Board of Directors, the integral components of which include, strategic planning, composition of the Board, policies and procedures, compensation procedures and completeness of information provision. The outcome of this assessment is that the Directors feel that the

Board is engaged in strategic matters, has put in place the required controls and gets all the necessary information in a timely manner. The Directors further feel that the independent Director(s) are equally involved in all decisions.

Going forward, persistent pricing pressure, currency devaluation, imposition of ad-hoc levies and increasing costs of doing business, continue to pose a risk to the Company's profitability, however the Board remains focused on making efforts to improve shareholders' value through efficiency enhancement and diversified initiatives.

Mr. Kamal A. Chinoy, Chief Executive of the Company, retired on June 30, 2019. During his tenure the market capitalization of the Company grew from Rs. 130 million in 1992 to Rs. 5 billion in 2019 and shareholders' equity went from Rs. 10 million to Rs. 4.4 billion. On behalf of the Board of Directors of the Company, I would like to express our gratitude and appreciation for 27 years of superlative leadership by Mr. Kamal A. Chinoy. Mr. Fahd Kamal Chinoy has been appointed as the new Chief Executive Officer of the Company as of July 1, 2019. I would like to welcome him to this position and wish him success in growing the Company further.

## Directors' Report

The Board of Directors are pleased to present the 66th Annual Report along with the audited accounts of the Company for the year ended June 30, 2019.

### Overview of the Company

Pakistan Cables Limited (the "Company") was the pioneering company in Pakistan's cable industry when it was established in 1953. The Company is principally engaged in the manufacture of conductors, cables and wires for transmission and distribution of electricity since 1953. The Company has also been manufacturing Aluminium sections/extrusions for the last four decades under the brand name of Alum-Ex. In 2008, the Company set up a PVC Compounding Plant to manufacture high quality electric cable grade PVC compound, as such the Company is integrated upstream for two of its critical raw material inputs, in the form of state of the art copper rod and PVC compounding plants. The Company has also invested in a 2 MW tri-generation power plant. These plants ensure that the Company has uninterrupted power supply and availability of key raw materials at lower input costs.

### Performance Review

#### Development of Business

Improvement in business processes is paramount for any industry to stay competitive in today's market. The Company is continuously engaged in business process re-engineering activities to optimize its activities and benefit from the technological advances in operational, technical and engineering functions. Initiatives are underway that will improve efficiencies, improve lead times, lower inventories and reduce wastages. The Company is continuously looking at ways to optimize systems to ensure proper visibility and monitoring of key metrics and is placing a greater emphasis on reporting and visibility through its ERP system.

The Company remains committed to ensure continuous improvement in overall efficiencies. Several steps are undertaken which include timely monitoring, review/analysis and corrective actions. There is enhanced visibility within our system via forecasting and monitoring on-time delivery, resulting in a positive impact on service levels and inventory controls. Constantly increasing benchmarking in all aspects of factory and supply chain performance is facilitating in the enhancement of excellence to higher levels.

The Company has geared up for higher production levels with capacity enhancement investments conducted in certain higher potential value streams. A new product, the ACCG conductor, has been added to the product mix which is targeted to be the future transmission and distribution conductor with huge advantages of energy loss reduction, low sag and high current capacity.

The Company is further promoting Lean Six Sigma culture to develop a mindset of continuous improvement, enhancing efficiency and ensuring consistency of quality in the processes. Young engineering employees are being groomed to become good practitioners to deploy the approach of Lean Six Sigma to facilitate the Company towards becoming a world class manufacturing in accordance with its long term strategic plan.

The Company closely monitors evolving customer needs and technology trends. A comprehensive product development program is in place at a cross functional level. With a greater emphasis on customer safety in recent times, several customers are opting for cables with greater safety features with greater flame retardancy and low smoke in the event of fire. As such, the Company is the first in Pakistan to have its Low Smoke Zero Halogen (LSZH) power cables type tested by the internationally renowned KEMA Laboratory. As per our knowledge, the Company is the only cable company in Pakistan to have a fire testing laboratory for flame propagation testing.

In the year 2018-2019, the Company embarked upon the development of new factory premises in Nooriabad, Sindh for the purposes of enhancing its manufacturing capabilities and creating efficiencies in its internal processes.

#### Performance of Business

The operating environment remained challenging during the year as there was a general slowdown in residential and industrial activity. As such, the market was extremely competitive and margins for specific orders came under pressure. With rising input costs, particularly due to depreciating value of the rupee vs the U.S. dollar, the value of the Company's product increased but given the overall economic context it was difficult to pass this all on to the customer.

As such, due to the adverse economic conditions prevailing in the country during the year, the Company's revenue showed modest growth. The Company achieved sales of Rs. 9.7 billion, which is marginally higher by 1.5% compared to last year's sales of Rs. 9.6 billion. This marginal increase in sale compared to last year is attributed to fall in economic activities in the country during the year.

Gross profit for the year amounted to Rs. 1,145.7 million (11.8% of sales), compared to last year's gross profit of Rs. 1,137.1 million (11.9% of sales). The lower gross profit, as a percentage to sales, is due to the devaluation of the Pak Rupee against the U.S. dollar which increased the cost of inputs, all of which could not be passed on to customers.

Marketing, selling and distribution cost for the year amounted to Rs. 509.8 million as compared to Rs. 438.3 million in the same period of last year. The increase is mainly on account of higher advertising expenses. Finance cost for the year are Rs. 188.6 million compared

to Rs. 133.6 million in the same period of last year. The increase is mainly due to an upward revision in policy rate by 575 basis points (BPS) during the year by the State Bank of Pakistan.

As a result of the difficult economic environment prevailing in the country, sharp fall in the value of the Pak Rupee and severe competition in the market, the Company earned a profit after tax of Rs. 126.2 million compared to Rs. 305.3 million in the same period of last year.

#### Dividends and Appropriations

For the current year, the Directors recommend payment of Rs. 1.00 per share (10%) as final cash dividend (2018: 35%) in addition to the interim cash dividend of Rs. 1.50 per share (15%) already paid (2018: interim cash dividend of 25%). The appropriation of profit will be as under:

**Business Review**

Along with the slowdown in construction activity, there was an increase in imports of cables for projects with special exemptions and as such the local industry remained at a disadvantage. With enhanced capacities in the cable industry as a whole, pricing for domestic projects lightened over the course of the year. Nevertheless, the Company is confident, that fundamentally there is a strong need for infrastructure development and construction in Pakistan and this is expected to drive the demand for wire and cable in the long term.

**Global Copper and Aluminum Scenario**

The prices of cables, copper rod, conductors and aluminium extrusions are closely linked to the global markets for Copper and Aluminium. Both base metals are traded on the London Metal Exchange ("LME"),

the world's premier non-ferrous metals market. The Average Daily Volumes (ADV) of contracts traded on the LME in 2018 was 17% higher than 2017. The price of both these metals are determined at the LME and any fluctuations in Copper or Aluminium prices have a direct effect on the pricing of Company's products.

Copper prices on the LME ranged between \$ 5,900 to \$ 6,400/l during the year. The prices remained steady during the first half of the year, however, in March 2019 they started to rise and went above \$ 6,500/l hitting their highest level in the past 8 months mainly due to low stocks, before easing off in June 2019 and finally closed at \$ 5,972/l on June 30, 2019 reflecting a fall of 10% over the last year. A graph of the monthly average of copper prices on the LME is shown below:

Uncertainty around the Pak Rupee : US Dollar parity has added another risk variable to our business and we will have to remain proactive in trying to reduce risk and maintain margin. Higher borrowing costs due to steep interest rates and growing working capital needs due to higher value imports as a result of the depreciating rupee may also have an impact on the overall profitability.

Chairman

KARACHI: August 9, 2019

In recent times, there has been growth in the import of cables, primarily due to various exemptions on duties and sales tax for imports of wire and cables provided to certain CPEC and special projects. The same exemptions are not available if our customers procure the product from local manufacturers of wire and cable. Should this trend continue, the Company's sales may come under pressure. As such, several efforts in recent times have been underway through the All Pakistan Cables and Conductors Manufacturers Association, as the benefits available to imported cables are not available to local manufacturers of wire and cable. This has resulted in an imbalanced playing field, which is an issue that impacts the entire domestic industry.

In this context, the Company's strategy has been to remain proactive with respect to approaching the Government on issues impacting the local industry. The Company intends to continue its initiatives in marketing its products, focus on enhanced efficiencies, aggressive sales efforts and support with continued improvement in customer services during this challenging time.

آئندہ سال میں کمپنی کو متوقع طور پر انتہائی مشکل حالات کا سامنا کرنا پڑ سکتا ہے۔ تعمیراتی سرگرمیوں میں سستی کی وجہ سے طلب متاثر ہو سکتی ہے اور اہداف دہاؤ میں رہ سکتے ہیں۔ جس کے نتیجے میں توانائی کی لاگت میں اضافہ ہوگا۔ امریکی ڈالر کے مقابلہ میں پاکستانی روپے کا عدم استحکام ہمارے کاروبار سے متعلق خدمات میں اضافہ کر سکتا ہے اور خطرات کو کم کرنے اور اہداف کو برقرار رکھنے کے لئے ہم ہمیشہ متحرک رہیں گے۔ انتہائی شرح سود کی وجہ سے قرضوں کی لاگت میں اضافہ اور بھی درآمدات کی بنا پر بڑھتا ہوا ورنگ کیمپل مجموعی طور پر منافع کو متاثر کر سکتا ہے۔

موجودہ حالات میں CPEC اور مخصوص منصوبوں کے لئے ڈیوٹی میں آسانی اور سیکورٹیز کے باعث دائرہ کار کے درآمدات میں اضافہ ہوا ہے۔

### کاروباری جائزہ

تعمیراتی سرگرمی میں سستی کے علاوہ خصوصی اسٹیٹی کے ساتھ پروڈیکٹس کے لئے گیندوں کی درآمد میں اضافہ ہوا اور مقامی صنعت تیزی کا شکار ہوئی۔ مجموعی طور پر گیندوں کی صنعت میں اضافی صلاحیت کے ساتھ مقامی پروڈیکٹس کی قیمت بر وقت حکم دہی۔ بہر حال، گیندوں پر عزم ہے کہ پاکستان میں بنیادی ڈھانچہ کی ترقی اور تعمیرات کی بنیادی طور پر بہت ضرورت ہے اور یہ توقع کی جاتی ہے کہ طویل مدت تک وائر اور گیندوں کی طلب بڑھے گی۔

### عالمی کارپوریشنوں کا عالمی معیار

گیندوں کا پر راز، کنڈکٹرز اور ایلیمنٹیم ماحولیات کی قیمتوں کا کارپوریشن کا عالمی معیار کی عالمی معیار میں قیمتوں سے منسوب تعلق ہے۔ دونوں دھاتوں کی انڈنٹیل ایلیمنٹیم (LME) میں

### گیندوں کا عالمی معیار

گیندوں کی عالمی معیار کو گیندوں کے لئے گیندوں پر مسلسل گرائی رکھے ہوئے ہے۔ مالی سال کے دوران، آپریشنز سے گیندوں کا گیندوں پر زیادہ سرمایہ کی ضرورت کی وجہ سے محدود رہا کیونکہ مالی سال کے آخری مہینہ میں انتہائی زیادہ سیکڑ کی وجہ سے

تعمیراتی ترقی بلند سطح پر پہنچ گئے۔

گیندوں کی شرم سوار وزیر مہالہ پر گہری گرائی رکھے ہوئے تاکہ چھت کے تمام مواقع سے استفادہ حاصل کیا جاسکے۔

تعمیراتی ترقی جاتی ہے جو دنیا کی سب سے بڑی غیر آہنی دھاتی مارکیٹ ہے۔ سال 2018ء میں LME پر معاہدوں کا اوسط ڈیلی حجم سال 2017ء سے 17 فی صد زیادہ ہے۔ ان دونوں دھاتوں کی قیمت کا تعین LME میں کیا جاتا ہے۔ اور ایلیمنٹیم اور کارپوریشنوں میں اتار چڑھاؤ کا براہ راست اثر ہماری مصنوعات پر پڑتا ہے۔

سال بھر میں LME پر کارپوریشن کی قیمت 5,900 سے 6,400 ڈالر فی ٹن رہی۔ سال کے پہلے نصف حصہ کے دوران قیمتوں میں استحکام رہا تاہم مارچ 2019ء میں قیمتوں میں اضافہ ہوا تاہم شروع ہوا گیندوں کی قیمت زخمیہ اندوڑی کی وجہ سے گذشتہ آٹھ ماہ کی بلند ترین 6,500 ڈالر فی ٹن تک بڑھ گئی۔ جون 2019ء میں سہل سے قبل 30 جون 2019ء کو 5,972 ڈالر فی ٹن پر بند ہوئی۔ جو گذشتہ برس میں 10 فی صد کم کی کا عکاس ہے۔ LME پر کارپوریشن ماہانہ اوسط قیمتوں کا گراف حسب ذیل ہے:

# ڈائریکٹرز کی رپورٹ

30 جون 2019ء کو اختتام پذیر سال کے لئے کینیڈا کے پڑتال شدہ کھاتوں کے ہمراہ 66 ویں سالانہ رپورٹ پیش کرنے میں ڈائریکٹرز کی سرگرمیوں کا ذکر ہے۔

## کینیڈا کا مادی جائزہ

1953ء میں قائم ہونے والی پاکستان کیمیلو لپڈ پانچ پاکستان کی کیمیل انڈسٹری کی بانی کیمپنیوں میں شمار ہوتی ہے۔ کینیڈا 1953ء سے بنیادی طور پر کنڈکٹرز، کیمیلو اور کیمیلو کی تریبل اور تقسیم کے لئے تاروں کی تیاری سے منسلک رہی۔ کینیڈا ایٹم ایکس کے نام سے گذشتہ چار دہائیوں سے ایلوٹیم، سیکشور/ایکسٹریکٹڈ تیار کر رہی ہے۔ سال 2008ء میں اعلیٰ معیار کی ایکٹریکٹڈ کیمیل گرینڈ PVC کپاؤنڈ کی تیاری کے لئے کینیڈا نے PVC کپاؤنڈنگ پلانٹ قائم کیا تاکہ کینیڈا اپنے دو خام مال میٹریل کو اکٹھا کر کے عالمی معیار کے کارپورٹ اور PVC کپاؤنڈنگ پلانٹس قائم کر سکے۔ کینیڈا نے 2 میگا واٹ ٹرائی جنریشن پاور پلانٹ میں بھی سرمایہ داری کی ہے۔ یہ پلانٹ بجلی کی بلا تعطل تریبل اور کم لاگت پر اہم خام مال کی دستیابی کو یقینی بناتے ہیں۔

## کارکردگی کا جائزہ

### کاروباری پیش رفت

آج کی مقابل منڈی میں قائم رہنے کے لئے کاروباری امور میں پیش رفت بر صنعت کا خاصہ ہے۔ کینیڈا مسلسل کاروباری عمل میں رہی انجینئرنگ سرگرمیوں میں منسلک ہے تاکہ کینیڈا اپنی سرگرمیوں کو بہتر کر سکے اور فعالی، تکنیکی اور انجینئرنگ امور میں تکنیکی جدت سے مستفید ہو سکے۔ ایسے اقدامات پر کام جاری ہے جس سے کارکردگی اور کام کی مدت میں بہتری آئی جائے اور خام مال کی فہرست اور فیاضی کو کم کیا جاسکے۔ کینیڈا دی میٹریکس کی نگرانی اور مناسب نمائش کو یقینی بنانے کی غرض سے انتظامات میں بہتری لانے کے لئے کوشاں ہے اور اپنے ERP سسٹم کے ذریعے رپورٹنگ اور انفرادیت پر بھرپور توجہ دے رہی ہے۔

کینیڈا کی کارکردگی میں مسلسل ترقی کو یقینی بنانے کے لئے ہمیشہ سے پر عزم ہے۔ بروڈنگرانی، جائزہ/سمانہ اور اصلاحی اقدامات جیسے کئی شعبوں میں بہتری لانے کے لئے انتظامی اقدامات اٹھائے گئے ہیں۔ ہمارے نظام میں وسیع شفافیت ہے جس میں بروڈنگرانی اور نگرانی شامل ہے جو خدمات کے معیار اور انٹرنی کنٹرول پر مثبت اثرات مرتب کرتے ہیں۔ ٹیکنیری کے تمام شعبوں میں مسلسل بڑھتے ہوئے رجحانات اور چیلنجی ماحول میں کارکردگی بہتر سے بہترین کے سڑ میں اہم کردار ادا کرتے ہیں۔

کینیڈا نے زیادہ منافع بخش شعبوں میں صلاحیت بڑھانے کے لئے سرمایہ کاری کی ہے تاکہ پروڈکشن کی اعلیٰ سطح کے ہدف کو حاصل کرنے میں آسانی پیدا ہو۔ مصنوعات کے مجموعہ میں ACCC کنڈکٹرز جیسی ایک نئی پروڈکٹ متعارف کرائی گئی ہے جس میں توانائی کے ضیاع میں کمی، کم ٹیک اور بجلی کی بچت کی زیادہ صلاحیت جیسے اہداف حاصل کرنے کے لئے تریبل اور تکنیکی کنڈکٹرز جیسی صنعت میں مقام حاصل کیا جاسکے۔

مزید برآں کینیڈا میں سیکس سٹاکس ہجرت متعارف کر رہی ہے تاکہ مسلسل ترقی کارکردگی میں اضافہ اور اعلیٰ کاموں میں معیار کے تسلسل کو یقینی بنایا جاسکے۔ کینیڈا اپنے سب سے اعلیٰ معیار کے منصوبوں پر کام کر کے عالمی معیار کی صنعت بننے کے لئے لیٹن سیکس سٹاکس مہارت کو بڑھانے کی غرض سے جووان انجینئرنگ ملازمین کی صلاحیت کو نکھارا جاتا ہے۔

کینیڈا میں صارفین کی متغیر ضروریات اور تکنیکی رجحانات پر باریک بینی سے غور کرتی ہے۔ فعالی سطح پر ایک جامع پروڈکٹ ڈیولپمنٹ پروگرام زیر اثر ہے۔ اس دور میں صارفین کے تحفظ پر بھرپور توجہ دیتے ہوئے متعدد صارفین آگ سے حفاظت اور چلاؤ کے دوران کم دھواں جیسی زیادہ حفاظتی خصوصیات کی حامل کیمیل پر افسار کرتے ہیں۔ لہذا کینیڈا نے پاکستان میں کیمیل مرچبائی شہرت یافتہ KEMA لیبارٹری سے ٹیسٹ شدہ لوسوک ڈیولپمنٹ (LSZH) پاور کیمیلو متعارف کر رہی ہے۔ ہمارے علم کے مطابق، یہ پاکستان کی واحد کیمیل کینیڈا ہے جس میں آگ کے پھیلاؤ کو ٹیسٹ کرنے کے لئے فائر ٹیسٹنگ لیبارٹری موجود ہے۔

سال 2018-2019 میں، کینیڈا نے لوری آباد، سندھ میں ایک نئی ٹیکنیری قائم کرنے کا فیصلہ کیا ہے تاکہ کینیڈا اپنی پیدوار کی صلاحیت اور انٹرنی معاملات میں بہترین کارکردگی میں اضافہ کر سکے۔

## کاروباری کارکردگی

رہائشی اور صنعتی سرگرمیوں کے فقدان کی وجہ سے سال بھر میں فعالیت کا ماحول غیر بے راہبند مارکیٹ انتہائی متقابل رہی اور رڈز کے رجحان پر بھی شدید باؤ رہا۔ ڈالر کے مقابلہ میں روپے کی قدر میں کمی کی وجہ سے ان پٹ لاگت میں اضافہ ہوا اور نتیجتاً کینیڈا کی مصنوعات کی قیمت میں اضافہ ہوا مجموعی معاشی تناظر میں یہ بوجہ صارف تک منتقل کرنا بہت مشکل تھا۔

سال بھر میں بدترین ملکی معاشی حالات کی وجہ سے کینیڈا کے یونیورسٹیوں میں متوازن ٹوکھا ہر ہوئی جب کہ کئی نتائج اسے سازگار نہ تھے۔ کینیڈا نے 9.7 بلین روپے کی سٹاک ہدف حاصل کیا جو گذشتہ سال میں 9.6 بلین روپے کی سٹاک ہدف کے مقابلہ میں صرف 1.5 فی صد زیادہ ہے۔ گذشتہ سال کے مقابلہ میں سٹاک میں یہ خفیف اضافہ سال بھر میں کارپوری قیمتوں میں کمی کی وجہ سے تھا اور ہمارے یونیورسٹیوں پر جس کے منفی اثرات مرتب ہوئے۔

گذشتہ سال کے 1,137.1 بلین روپے (سٹاک 11.96% فی صد) مجموعی نفع کے مقابلہ میں رواں سال 1,145.7 بلین روپے (سٹاک 11.88% فی صد) کا مجموعی منافع حاصل کیا گیا۔ فی صد سٹاک پر مجموعی منافع میں کمی ڈالر کے مقابلہ میں روپے کی قدر میں کمی کی وجہ سے ہوئی۔ جس کی وجہ سے ہماری ان پٹ لاگت میں اضافہ ہوا اور اسے صارفین تک منتقل کیا جاسکا۔

پاکستانی روپے کی قدر میں انتہائی کمی کی وجہ سے ایجنسی معیشت اور مارکیٹ میں شدید مقابلہ کی فضا کی وجہ سے آپ کی کینیڈا نے گذشتہ سال میں 305.3 بلین روپے کے مقابلہ میں 126.2 بلین روپے نفع علاوہ ٹیکس حاصل کیا۔

### CASH FLOW ANALYSIS

# Share Price Sensitivity

In Pakistan's market, market forces are more likely to affect share prices compared to the fundamentals. However, managements understand that following points are perceived to have effects on share price of the Company.

## Investment in Energy sector

High

Investment in Energy sector both by Government and private sector has direct impacts over the performance of Company's growth and its share price. Pakistan has increased the electricity production in past few years. However, transmission lines need to be revamped and any investment in transmission line will have positive impact over the share price of the Company.

## Energy Crisis

Medium

Un-interrupted energy supply is the key for any industrial undertaking and in case there is any interruption in supply, the Company has to switch to other means of energy. This also affect the overall production performance of the Company. During the year 2018-19, the supply condition remained challenging, especially during third quarter of the year.

## Law and Order

Medium

Law and Order situation is another key variant in determining not only the performance of Company, but also overall economy of the country. Law and order situation has remained stable during the year and is much dependent over the consistency of current government.

## Cash Reward

High

Company is the only listed cable manufacturer in Pakistan and is perceived as a growth stock instead of cash earning Company by the investors. Despite this, Company paid dividend of Rs. 2.50 / share this year. This would definitely have positive impacts over the share price in long run. This was in line with the Company's strategy to maintain a balance between cash distribution and re-investment in to future business.

## Exchange Rate parity

High

Majority of the Company's raw material consist of imported items and are subject to change in exchange rate parity. Any impact on value of Rupee would have direct impact over the performance of the Company. Though management strives to be dynamic in its pricing mechanism so that any fluctuation in exchange rate does not have impact over the bottom line, however, not all of the impact can be factored in as desired.

## Interest Rates

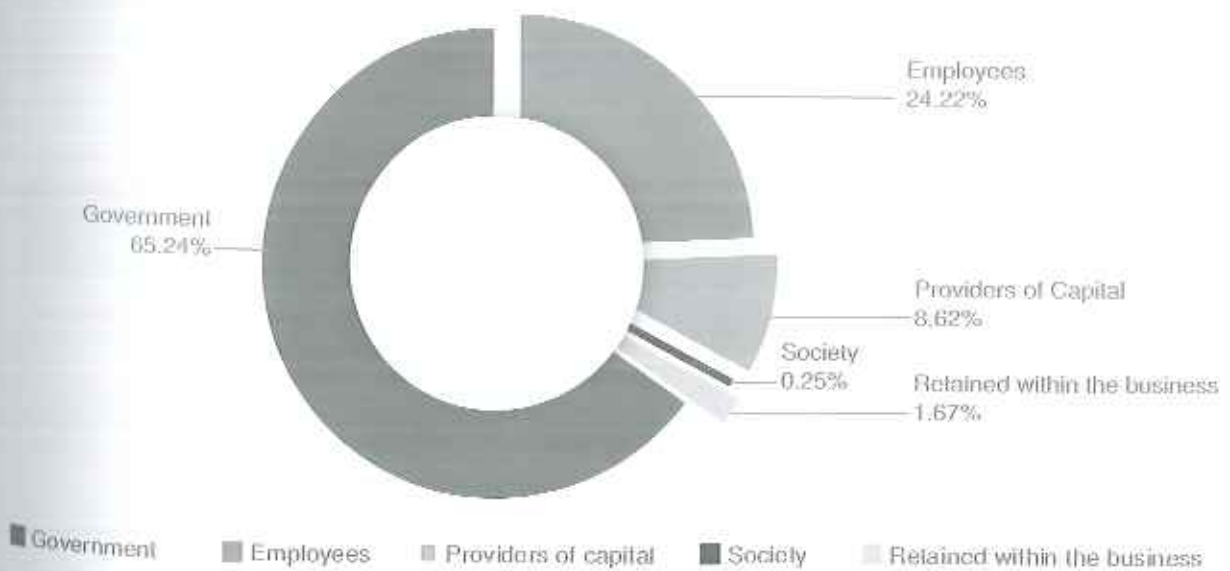

Medium

Company's major source of funding is bank borrowing and fluctuation in interest rate directly impacts the bottom line of Company's profit and loss. During the year effective borrowing rate remained higher throughout the year and Company bottom line had corresponding effects.

### Opinion

We have audited the annexed financial statements of Pakistan Cables Limited ("the Company"), which comprise the statement of financial position as at 30 June 2019, and the statement of profit or loss, statement of comprehensive income, the statement of changes in equity, statement of cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies and other explanatory information, and we state that we have obtained all the information and explanations which, to the best of our knowledge and belief, were necessary for the purposes of the audit.

In our opinion and to the best of our information and according to the explanations given to us, the statement of financial position, statement of profit or loss, statement of comprehensive income, the statement of changes in equity and statement of cash flows together with the notes forming part thereof conform with the accounting and reporting standards as applicable in Pakistan and give the information required by the Companies Act, 2017 (XIX of 2017), in the manner so required and respectively give a true and fair view of the state of the Company's affairs as at 30 June 2019 and of the profit and other comprehensive income, the changes in equity and its cash flows for the year then ended.

### Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs) as applicable in Pakistan. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants as adopted by the Institute of Chartered Accountants of Pakistan (the Code) and we have fulfilled our other ethical responsibilities in accordance with the Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

### Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Following are the Key audit matters:

S. No.	Key audit matters	How the matter was addressed in our audit
1.	<b>Revenue Recognition</b>	
	Refer note 26 to the financial statements and the accounting policy in note 3.9 to the financial statements regarding the sale of goods.  The Company generates revenue from sale of goods to domestic as well as export customers.	Our audit procedures to assess the timing of revenue recognized from the sale of products included the following:  <ul style="list-style-type: none"> <li>obtained an understanding of the processes relating to the recognition of revenue and accessing the design, implementation and operating effectiveness of key internal controls over the recording of revenue;</li> </ul>

S. No.	Key audit matters	How the matter was addressed in our audit
	We identified recognition of revenue (against the sale of goods) as a key audit matter because revenue is one of the key performance indicators of the Company which gives rise to an inherent risk of the existence and the accuracy of the revenue.	<ul style="list-style-type: none"> <li>comparing a sample of revenue transactions recognized during the year with the sales invoices, delivery orders and other relevant underlying documentations; and</li> <li>comparing a sample of revenue transactions recorded around the year end with the sales invoices, delivery orders and other relevant underlying documentations to access if the related revenue was recorded in the appropriate accounting period.</li> </ul>
2.	<b>Valuation of Stock-in-Trade</b>	
	Refer to note 11 to the financial statements and the accounting policy in note 3.6 to the financial statements.  As at 30 June 2019, the Company's stock-in-trade amounted to Rs. 2,203.20 million. This significantly comprised of Copper Cathode, Copper rods, and Aluminum billets.  We identified the valuation of stock-in-trade as a key audit matter because determining an appropriate write-down as a result of net realizable value (NRV) being lower than their cost involved significant management judgement and estimation.	Our audit procedures to assess the valuation of stock-in-trade included the following:  <ul style="list-style-type: none"> <li>obtaining an understanding of the management's basis for the determination of NRV and the key estimates adopted, including future selling prices and costs necessary to make the sales and the basis of the calculation and justification for the amount of the write-downs and provisions;</li> <li>assessing the NRV of stock-in-trade by comparing, on a sample basis, management's estimation of future selling prices for the products with the selling prices achieved subsequent to the end of the reporting period; and</li> <li>comparing NRV to the cost of a sample of stock-in-trade and comparison to the associated provision to assess whether stock-in-trade provisions are complete.</li> </ul>
3.	<b>Valuation of Trade Debts</b>	
	Refer to note 12 to the financial statements and the accounting policy in note 3.14 to the financial statements.  The Company has a significant balance of trade debts. Provision against doubtful trade debts is based on loss allowance for Expected Credit Loss (ECLs).  The ECL model has been adopted during the year due to the application of IFRS 9 (Financial Instruments). Details about the application of the IFRS and the effect is given in note 4.2 to the financial statements.  We identified recoverability of trade debts as a key audit matter as it involves significant management judgement in determining the recoverable amount of trade debts.	Our audit procedures to assess the valuation of trade debts, amongst others, included the following:  <ul style="list-style-type: none"> <li>obtaining an understanding of the management's basis for the determination of the provision required at the year end and the receivables collection process;</li> <li>involving a specialist to verify the accuracy and reasonableness of assumptions of ECLs.</li> <li>assessing the method used by the company for the recognition of the impact of the application of IFRS 9 regarding provision for doubtful debts as allowable under IFRS 9.</li> <li>testing the accuracy of the data on a sample basis extracted from the Company's accounting system which has been used to calculate the provision required including the subsequent recoveries.</li> </ul>

### Information Other than the Financial Statements and Auditor's Report Thereon

Management is responsible for the other information. The Other Information comprises the information included in the Company's Annual Report for 2019 but does not include the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the Other Information and, if doing so, consider whether the Other Information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this Other Information, then we are required to report that fact. We have nothing to report in this regard.

### Responsibilities of Management and Board of Directors for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with the accounting and reporting standards as applicable in Pakistan and the requirements of Companies Act, 2017 (XIX of 2017) and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Board of directors are responsible for overseeing the Company's financial reporting process.

### Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs as applicable in Pakistan will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs as applicable in Pakistan, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the board of directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the board of directors with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with the board of directors, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

### Report on Other Legal and Regulatory Requirements

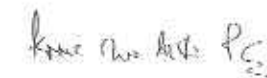

Based on our audit, we further report that in our opinion:

- a) proper books of account have been kept by the Company as required by the Companies Act, 2017 (XIX of 2017);
- b) the statement of financial position, the statement of profit or loss, statement of comprehensive income, the statement of changes in equity and statement of cash flows together with the notes thereon have been drawn up in conformity with the Companies Act, 2017 (XIX of 2017) and are in agreement with the books of account and returns;
- c) investments made, expenditure incurred and guarantees extended during the year were for the purpose of the Company's business; and
- d) zakat deductible at source under the Zakat and Ushr Ordinance, 1980 (XVIII of 1980), was deducted by the company and deposited in the Central Zakat Fund established under section 7 of that Ordinance.

The engagement partner on the audit resulting in this independent auditor's report is Aryn Pirani.

- International Financial Reporting Standards (IFRS) issued by the International Accounting Standard Board (IASB) as notified under the Companies Act, 2017; and
- Provisions of and directives issued under the Companies Act, 2017.

Where the provisions of and directives issued under the Companies Act, 2017 differ with the requirements of IFRS, the provisions of and directives issued under the Companies Act, 2017 have been followed.

### 2.2 Basis of measurement

These financial statements have been prepared under the historical cost convention except that the land and building are stated at revalued amounts, less accumulated depreciation and impairment losses, if any.

### 2.3 Functional and presentation currency

These financial statements are presented in Pakistani rupee which is the Company's functional currency. All financial information presented in Pakistani rupee has been rounded off to the nearest thousand, unless otherwise stated.

### 2.4 Use of estimates and judgements

In preparing these financial statements, management has made judgment, estimates and assumptions that affect the application of the Company's accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates. Estimates and underlying assumptions are reviewed on an ongoing basis. Revision to estimates are recognized prospectively. Information about judgments made in applying accounting policies that have the most significant effects on the amount recognized in the financial statements to the carrying amount of the assets and liabilities and assumptions and estimation uncertainties that have a significant risk resulting in a material adjustment in the subsequent year are set forth below:

- Staff retirement benefits and other benefits (refer note 3.2)
- Trade debts, loans, advances, deposits, prepayments and other receivables (refer note 3.14)

## Notes to the Financial Statements For the year ended 30 June 2019

- Taxation (refer note 3.3)
- Provisions (refer note 3.10)
- Impairment (refer notes 3.18 and 3.20)

### 2.5 Change in accounting standards, interpretations and amendments to published approved accounting standards

- a) Standards, interpretations and amendments to published approved accounting standards that are effective but not relevant

There are certain new standards, amendments to the approved accounting standards and interpretations that are mandatory for accounting periods beginning on or after 1 July 2018 (other than those which have been disclosed in note 4 to these financial statements). However, these do not have any significant impact on the Company's financial reporting and therefore have not been detailed in these financial statements.

- b) Standards, interpretations and amendments to published approved accounting standards that are not yet effective

The following are the new standards, amendments to existing approved accounting standards and new interpretations that will be effective for the periods beginning on or after 1 July 2019, that may have an impact on the financial statements of the Company:

- IFRIC 23 'Uncertainty over Income Tax Treatments' (effective for annual periods beginning on or after 1 January 2019) clarifies the accounting for income tax when there is uncertainty over income tax treatments under IAS 12. The interpretation requires the uncertainty over tax treatments to be reflected in the measurement of current and deferred tax. The application of interpretation is not likely to have an impact on Company's financial statements.
- IFRS 16 'Leases' (effective for annual period beginning on or after 1 January 2019). IFRS 16 replaces existing leasing guidance, including IAS 17 'Leases', IFRIC 4 'Determining whether an Arrangement contains a Lease', SIC-15 'Operating Leases- Incentives' and SIC-27 'Evaluating the Substance of Transactions Involving the Legal Form of a Lease'. IFRS 16 introduces a single on-balance sheet lease accounting model for lessees. A lessee recognizes a right-of-use asset representing its right to use the underlying asset and a lease liability representing its obligation to make lease payments. There are recognition exemptions for short-term leases and leases of low-value items. Lessor accounting remains similar to the current standard i.e. lessors continue to classify leases as finance or operating leases. The management has completed an initial assessment of the potential impact of the standard on Company's lease arrangements. Based on the initial assessment, the Company is expected to recognise 'Right of use assets' and lease liability of Rs. 135.85 million and 108.63 million respectively as of 01 July 2019.
- Amendment to IFRS 9 'Financial Instruments' – Prepayment Features with Negative Compensation (effective for annual periods beginning on or after 1 January 2019). For a debt instrument to be eligible for measurement at amortised cost or FVOCI, IFRS 9 requires its contractual cash flows

## Notes to the Financial Statements For the year ended 30 June 2019

to meet the SPPI criterion – i.e. the cash flows are 'solely payments of principal and interest'. Some prepayment options could result in the party that triggers the early termination receiving compensation from the other party (negative compensation). The amendment allows that financial assets containing prepayment features with negative compensation can be measured at amortised cost or at fair value through other comprehensive income (FVOCI) if they meet the other relevant requirements of IFRS 9. The application of amendment is not likely to have an impact on Company's financial statements.

- Amendment to IAS 28 'Investments in Associates and Joint Ventures' - Long Term Interests in Associates and Joint Ventures (effective for annual period beginning on or after 1 January 2019). The amendment will affect companies that finance such entities with preference shares or with loans for which repayment is not expected in the foreseeable future (referred to as long-term interests or 'LTI'). The amendment and accompanying example state that LTI are in the scope of both IFRS 9 and IAS 28 and explain the annual sequence in which both standards are to be applied. The amendments are not likely to have an impact on Company's financial statements.
- Amendments to IAS 19 'Employee Benefits' - Plan Amendment, Curtailment or Settlement (effective for annual periods beginning on or after 1 January 2019). The amendments clarify that on amendment, curtailment or settlement of a defined benefit plan, a company now uses updated actuarial assumptions to determine its current service cost and net interest for the period; and the effect of the asset ceiling is disregarded when calculating the gain or loss on any settlement of the plan and is dealt with separately in other comprehensive income. The application of amendments is not likely to have an impact on Company's financial statements.
- Amendment to IFRS 3 'Business Combinations' – Definition of a Business (effective for business combinations for which the acquisition date is on or after the beginning of annual period beginning on or after 1 January 2020). The IASB has issued amendments aiming to resolve the difficulties that arise when an entity determines whether it has acquired a business or a group of assets. The amendments clarify that to be considered a business, an acquired set of activities and assets must include, at a minimum, an input and a substantive process that together significantly contribute to the ability to create outputs. The amendments include an election to use a concentration test. The standard is effective for transactions in the future and therefore would not have an impact on past financial statements.
- Amendments to IAS 1 Presentation of Financial Statements and IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors (effective for annual periods beginning on or after 1 January 2020). The amendments are intended to make the definition of material in IAS 1 easier to understand and are not intended to alter the underlying concept of materiality in IFRS. In addition, the IASB has also issued guidance on how to make materiality judgments when preparing their general purpose financial statements in accordance with IFRS.
- On 29 March 2018, the International Accounting Standards Board (the IASB) has issued a revised Conceptual Framework for Financial Reporting which is applicable immediately contains changes that will set a new direction for IFRS in the future. The Conceptual Framework primarily serves as a tool for the IASB to develop standards and to assist the IFRS Interpretations Committee in interpreting them. It does not override the requirements of individual IFRSs and any inconsistencies with the revised Framework will be subject to the usual due process – this means that the overall

impact on standard setting may take some time to crystallise. The companies may use the Framework as a reference for selecting their accounting policies in the absence of specific IFRS requirements. In these cases, companies should review those policies and apply the new guidance retrospectively as of 1 January 2020, unless the new guidance contains specific scope outs.

- Annual Improvements to IFRS Standards 2015–2017 Cycle - the improvements address amendments to following approved accounting standards:
- IFRS 3 Business Combinations and IFRS 11 Joint Arrangement - the amendment aims to clarify the accounting treatment when a company increases its interest in a joint operation that meets the definition of a business. A company remeasures its previously held interest in a joint operation when it obtains control of the business. A company does not remeasure its previously held interest in a joint operation when it obtains joint control of the business.
- IAS 12 Income Taxes - the amendment clarifies that all income tax consequences of dividends (including payments on financial instruments classified as equity) are recognized consistently with the transaction that generates the distributable profits.
- IAS 23 Borrowing Costs - the amendment clarifies that a company treats as part of general borrowings any borrowing originally made to develop an asset when the asset is ready for its intended use or sale.

The above amendments are effective from annual period beginning on or after 1 January 2019 and are not likely to have an impact on Company's financial statements.

### 3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The accounting policies set out below have been applied consistently to all the periods presented in these financial statements, except for the changes mentioned in note 4 to these financial statements.

#### 3.1 Investment in associate - equity method

Investments in associate where the Company has significant influence but not control over the financial and operating policies are accounted for using equity basis of accounting, under which the investment in associate are initially recognised at cost and the carrying amounts are increased or decreased to recognise the Company's share of the profit or loss of the associate after the date of acquisition, less impairment losses, if any. The Company's share of the profit or loss of the associate is recognised in the Company's profit or loss.

Distributions received from associate reduce the carrying amount of the investment. Adjustments to the carrying amounts are also made for changes in the Company's proportionate interest in the associate arising from changes in the associate's other comprehensive income and surplus on revaluation of fixed assets. The Company's share of those changes are respectively recognised directly in other comprehensive income and surplus on revaluation of fixed asset account of the Company.

Gain / loss on sale of above investments, if any, are recognised in the period of sale. The carrying amount of the investment is tested for impairment, by comparing its recoverable amount (higher of value in use and fair value less costs to sell) with its carrying amount and loss, if any is recognised in the profit and loss account.

### 3.2 Staff retirement benefits and other benefits

The Company's obligation under the pension and gratuity schemes are determined through actuarial valuations carried out under the "Projected Unit Credit Method". Actuarial valuations are conducted annually and the latest valuation was conducted at the balance sheet date (30 June 2019). When the calculation results in a potential asset for the company, the recognised asset is limited to the present value of economic benefits available in the form of any future refunds from the plan or reduction in future contributions to the plan. Service costs are recognised in profit and loss in the period in which they occur. Net interest on net defined benefit liability is also recognised in profit and loss. Net of tax remeasurement comprising actuarial gain / loss, the return on plan assets (excluding interest) and the effect of the asset ceiling (excluding interest) are recognised in other comprehensive income.

Income Tax expense is recognized in the profit and loss account, except to the extent that it relates to items recognized directly in the other comprehensive income or in equity, in which case it is recognized in the other comprehensive income or equity respectively.

#### Current

Provision for current taxation is based on taxability of certain income streams under final tax regime at the applicable tax rates and remaining income streams chargeable at current rate of taxation under the normal tax regime after taking into account tax credits and tax rebates available, if any. Provision of current tax is determined using the tax rate enacted at the balance sheet date.

# Notes to the Financial Statements

These are based on historical experience and are continuously reviewed.

Items in-transit are valued at lower of cost and net realisable value. Cost comprises invoice value plus other charges paid thereon up to the balance sheet date.

The Company accounts for impairment, where indications exist, by reducing asset's carrying amount to the recoverable amount.

### 3.17 Financial assets

Financial assets are initially recognised at the time when the Company becomes a party to the contractual provision of the instrument.

Financial assets currently comprising of the assets 'measured at amortised cost', are initially measured at fair value plus, transaction costs that are directly attributable to its acquisition. These assets are subsequently measured at amortised cost using the effective interest method. The amortised cost is reduced by impairment losses. Interest / markup income, foreign exchange gains and losses and impairment are recognized in the statement of profit or loss.

Financial assets are derecognized when the rights to receive cash flows from the financial assets have expired or have been transferred and the Company has transferred substantially all risks and rewards of ownership.

### 3.18 Impairment of financial assets

The Company recognises loss allowances for Expected Credit Loss (ECLs) in respect of financial assets measured at amortised cost.

The Company measures loss allowances at an amount equal to lifetime ECLs, except for the bank balance for which credit risk (i.e. the risk of default occurring over the expected life of the financial instrument) has not increased significantly since initial recognition (although in this case the measurement is at 12 month ECLs).

Loss allowances for trade receivables are always measured at an amount equal to lifetime ECLs.

When determining whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating ECLs, the Company considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the Company's historical experience and informed credit assessment and including forward-looking information.

The Company assumes that the credit risk on a financial asset has increased significantly if it is more than past due for a reasonable period of time. Lifetime ECLs are the ECLs that result from all possible default events over the expected life of a financial instrument. 12-month ECLs are the portion of ECLs that result from default events that are possible within the 12 months after the reporting date (or a shorter period if the expected life of the instrument is less than 12 months). The maximum period considered when estimating ECLs is the maximum contractual period over which the Company is exposed to credit risk.

# Notes to the Financial Statements

## For the year ended 30 June 2019

Loss allowances for financial assets measured at amortised cost are deducted from the Gross carrying amount of the assets.

The Gross carrying amount of a financial asset is written off when the Company has no reasonable expectations of recovering a financial asset in its entirety or a portion thereof. The Company individually makes an assessment with respect to the timing and amount of write-off based on whether there is a reasonable expectation of recovery. The Company expects no significant recovery from the amount written off. However, financial assets that are written off could still be subject to enforcement activities in order to comply with the Company's procedures for the recovery of amounts due.

### 3.19 Financial liabilities

Financial liabilities include long-term loan, loan from banking companies, trade and other payables and mark-up accrued on bank borrowings and are initially recognised at the time when the Company becomes party to the contractual provisions of the instruments. All financial liabilities are recognised initially at fair value plus directly attributable transactions costs, if any, and subsequently measured at amortised cost using effective interest rate method, where applicable. The Company derecognises the financial liabilities when they are extinguished, that is, when the obligation referred in the contract is discharged, cancelled or have expired. Gain or loss on derecognition is recognised in the profit and loss account.

### 3.20 Impairment of non-financial assets

The carrying amount of the Company's non-financial assets are reviewed at each reporting date to determine whether there is any objective evidence that an asset or group of assets may be impaired. If any such an evidence exists, the asset's or group of assets' recoverable amount is estimated. An impairment loss is recognized whenever the carrying amount of an asset exceeds its recoverable amount. Recoverable amount is the higher of the value in use and fair value less cost to sell. Impairment losses are recognized in the statement of profit or loss.

## 4. CHANGES IN ACCOUNTING POLICIES

The Company has adopted IFRS 15 'Revenue from Contracts with Customers' and IFRS 9 'Financial Instruments' from 01 July 2018 which are effective from annual periods beginning on or after 01 July 2018 and for reporting period / year ending on or after 30 June 2019 respectively.

The details of new significant accounting policies adopted and the nature and effect of the changes to previous accounting policies are set out below:

### 4.1 IFRS 15 'Revenue from Contracts with Customers'

IFRS 15 became applicable to the Company with effect from 1 July 2018 and replaced IAS 18 Revenue, IAS 11 Construction Contracts and related interpretations. Under IFRS 15, revenue is recognised when a customer obtains control of the goods and services. The Company has applied the modified retrospective method upon adoption of IFRS 15 as allowed under the Standard. This method requires the recognition of the cumulative effect (without practical expedients) of initially applying IFRS 15 to retained earnings.

# Notes to the Financial Statements

## For the year ended 30 June 2019

The Company manufactures and contracts with customers for the sale of wires and cables, aluminium profiles and PVC compound which generally include single performance obligation. Management has concluded that revenue from sale of goods be recognised at the point in time when control of the product has transferred, being when the products are delivered to the customer. Invoices are generated and revenue is recognised on delivery of products. Delivery occurs when the products have been shipped to or / and delivered to the customer's destination / specific location, the risks of loss have been transferred to the customer and the customer has accepted the product either as per the sales contract or lapse of acceptance provision or the Company has objective evidence that all criteria for acceptance have been satisfied. Revenue is measured based on the consideration specified in a contract with a customer.

The Company receives short term advances from its customers. Prior to adoption of IFRS 15, an advance consideration received from customers was included in 'Trade and other payables' which now is reclassified in 'Contract liabilities' presented separately on statement of financial position. In addition, reclassification has been made from 'Trade and other payables' to 'Contract liabilities' for outstanding balance of advance from customers for prior year to provide comparison. A receivable is recognised when the goods are delivered as this is the point in time that the consideration is unconditional because only the passage of time is required before the payment is due.

The above is generally consistent with the timing and amounts of revenue the Company recognised in accordance with the previous standard, IAS 18. Therefore, the adoption of IFRS 15 did not have an impact on the timing and amounts of revenue recognition of the Company.

Apart from providing more extensive disclosures, the application of IFRS 15 has not had a significant impact on the financial position and / or financial performance of the Company for the reasons described above. Accordingly there was no adjustment to retained earnings on application of IFRS 15 at 1 July 2018. However as required the Company has disaggregated revenue recognised from contracts with customers into categories that depict how the nature, amount, timing and uncertainty of revenue and cash flows are affected by economic factors.

### 4.2 IFRS 9 Financial Instruments

IFRS 9 replaces the provisions of IAS 39 'Financial Instruments: Recognition and Measurement' that relates to the recognition, classification and measurement of financial assets and financial liabilities, derecognition of financial instruments, impairment of financial assets and hedge accounting. The Company has applied the modified retrospective method upon adoption of IFRS 9 as allowed under the Standard. This method requires the recognition of the cumulative effect (without practical expedients) of initially applying IFRS 9 to retained earnings. Accordingly, the information presented for 2018 have not been restated i.e. it is presented, as previously reported under IAS 39 and related interpretations.

The details of new significant accounting policies and the nature and effect of the changes to previous accounting policies are set out below:

#### i Classification and measurement of financial assets and financial liabilities

IFRS 9 largely retains the existing requirements in IAS 39 for the classification and measurement of financial liabilities. However, it eliminates the previous IAS 39 categories for financial assets of held

## Notes to the Financial Statements For the year ended 30 June 2019

to maturity, loans and receivables, held for trading and available for sale. Although IFRS 9 classifies the financial assets in several categories, the only category currently applicable to the Company is measurement at 'amortised cost'.

A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at fair value through profit or loss:

- It is held within business model whose objective is to hold assets to collect contractual cashflows.
- Its contractual terms give rise on specified dates to cashflows that are solely payments of principals and interest on principal amount outstanding.

A financial asset is initially measured at fair value plus, transaction costs that are directly attributable to its acquisition.

The adoption of IFRS 9 did not have a significant effect on the Company's accounting policies related to the financial liabilities.

The accounting policies that apply to financial instruments are stated in 3.17, 3.18, 3.19 and 3.20 to the financial statements.

The following table explains the original measurement categories under IAS 39 and the new measurement categories under IFRS 9 for each class of the Company's financial assets as at 1 July 2018.

	Original classification under IAS 39	New classification under IFRS 9	Original Carrying Amount	New Carrying Amount
<b>(Rupees in '000)</b>				
<b>As at 1 July 2018</b>				
Long-term loans receivable	Loans and receivables	Amortised cost	5,721	5,721
Trade debts	Loans and receivables	Amortised cost	1,971,710	1,957,168
Short-term loans	Loans and receivables	Amortised cost	4,309	4,309
Short-term deposits	Loans and receivables	Amortised cost	36,328	36,328
Other receivables	Loans and receivables	Amortised cost	165	165
Cash and bank balances	Loans and receivables	Amortised cost	572,866	572,866
<b>Total financial assets</b>			<b>2,591,099</b>	<b>2,576,557</b>

### ii Impairment

IFRS 9 replaces the 'incurred loss' model in IAS 39 with an 'expected credit loss' (ECL) model. IFRS 9 introduces a forward looking expected credit losses model, rather than the current incurred loss model, when assessing the impairment of financial asset in the scope of IFRS 9. The new impairment model applies to financial assets measured at amortised cost, contract assets and debt investments at FVOCI, but not to investments in equity instruments.

## Notes to the Financial Statements For the year ended 30 June 2019

The Company has applied the IFRS 9 simplified approach to measuring expected credit losses which uses a lifetime expected loss allowance for all trade and other receivables. Impairment losses related to trade and other receivables, are presented separately in the statement of profit or loss. Trade and other receivables are written off when there is no reasonable expectation of recovery. Management has used actual credit loss experience over past years to base the calculation of ECL on the adoption of IFRS 9.

As explained above, the management has applied the modified retrospective method upon the adoption of IFRS 9 as allowed under the Standard. The cumulative effect representing the difference between the carrying amount before the adoption of IFRS 9 and the new carrying amount calculated in accordance with the standard at the beginning of the current year (i.e. as of 1 July 2018), has been recognised in reserves (accumulated profit). The financial impact due to the adoption of the ECL model as explained above under IFRS 9 is as follows:

	(Rupees in '000)
Accumulated profit as of 1 July 2018	215,336
Affect of the change due to the application of ECL model under IFRS 9	(14,542)
Adjusted accumulated profit as of 1 July 2018	<u>200,794</u>

Similar adjustment has been recorded in trade debts also (refer note 12.2)

### 23.2 Provision for import levies

This represents provision for import levies on imported raw materials and machines, etc. The Company along with many other companies has filed appeal against the levy of Infrastructure Cess at the import stage levied by the Provincial Government. The case was initially decided by the High Court of Sindh in the year 2008 according to which this levy was applicable for the period from 28 December 2006 onwards while it was not applicable on consignments cleared prior to this date. The decision was challenged by both the department and the companies in the Honourable Supreme Court which referred back the matter to the High Court in the year 2011. During the year 2012, the High Court passed an interim order through which all the appellant companies were required to pay 50% of the amount involved in this respect on the consignments cleared between 28 December 2006 to 30 May 2011 and to give bank guarantees for the balance amount. Guarantees submitted for the period prior to 28 December 2006 were also to be released by the department. Further, all consignments after 30 May 2011 are being released on the basis of 50% payment in cash and 50% on furnishing of bank guarantees. This is an interim arrangement and is subject to the final order by the High Court which may be issued in due course of time. Further the Sindh Government has promulgated another version of Infrastructure Cess Act, 2017.

23.3 The balance payable is for June 2019 and was paid subsequent to the year end.

### 37. FINANCIAL INSTRUMENTS

#### Financial risk management

The Board of Directors of the Company has the overall responsibility for the establishment and oversight of the Company's risk management framework. The Board of Directors is also responsible for developing and monitoring the Company's risk management policies. The Company has exposure to the following risks from its use of financial instruments:

- Credit risk
- Liquidity risk
- Market risk

#### 37.1 Credit risk

Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss, without taking into account the fair value of any collateral. Concentration of credit risk arises when a number of counter parties are engaged in similar business activities or have similar economic features that would cause their ability to meet contractual obligations to be similarly affected by changes in economics, political or other conditions. Concentrations of credit risk indicate the relative sensitivity of the Company's performance to developments affecting a particular industry.

Credit risk of the Company arises principally from the trade debts, loans and advances, trade deposits, bank balances and other receivables. The carrying amount of financial assets represents the maximum credit exposure. To reduce the exposure to credit risk the Company has developed a formal approval process whereby credit limits are applied to its customers. The management continuously monitors the credit exposure towards the customers and makes provision against those balances considered doubtful of recovery (and also obtains security / advance payments, wherever considered necessary). Cash is held only with reputable banks with high quality credit worthiness.

The maximum exposure to credit risk at the reporting date is as follows:

	2019 (Rupees in '000)	2018 (Rupees in '000)
Trade debts	2,088,764	1,971,710
Loans and advances	12,275	10,030

### 37.2 Liquidity risk

Liquidity risk is the risk that the Company will encounter difficulty in meeting its financial obligations as they fall due. Liquidity risk arises because of the possibility that the Company could be required to pay its liabilities earlier than expected or difficulty in raising funds to meet commitments associated with financial liabilities as they fall due. The Company's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation. Following are the contractual maturities of undiscounted financial liabilities, including interest payments (based on the remaining period to maturity):

## Notes to the Financial Statements For the year ended 30 June 2019

**37.2.1** The contractual cash flows relating to the above financial liabilities have been determined on the basis of mark-up rates effective as at 30 June (and includes both principal and interest payable thereon). The rates of mark-up have been disclosed in note 19 and 24 to these financial statements.

### 37.3 Market risk

Market risk is the risk that the value of the financial instrument may fluctuate as a result of changes in market interest rates or the market price due to a change in credit rating of the issuer or the instrument, change in market sentiments, speculative activities, supply and demand of securities and liquidity in the market. The Company is exposed to currency risk and interest rate risk only.

#### 37.3.1 Currency risk

Foreign currency risk is the risk that the value of a financial asset or liability will fluctuate due to a change in foreign exchange rates. It arises mainly where receivables and payables exist due to transactions entered into foreign currencies.

The Company is exposed to currency risk on bank balance, borrowings and import of raw materials that are denominated in a foreign currency (primarily U.S. Dollar). The Company's exposure to foreign currency risk is as follows:

	2019		2018	
	Rupees in '000	US Dollars in '000	Rupees in '000	US Dollars in '000
Bank balance	34,489	210	26,114	215
Creditors	(27,036)	(164)	(14,314)	(118)
<b>Exposure</b>	<b>7,453</b>	<b>46</b>	<b>11,800</b>	<b>97</b>

Above exposure is payable by the Company in Rupees at the rate on which these are settled by the Company.

Following are the significant exchange rates applied during the year:

	Average rates		Balance sheet date rate	
	2019 (Rupees)	2018 (Rupees)	2019 (Rupees)	2018 (Rupees)
US Dollars	136.32	109.97	164.50	121.60

#### Sensitivity analysis

A five percent strengthening / (weakening) of the Rupee against US Dollar at 30 June would have increased / (decreased) the Statement of Profit and Loss by of Rs. 0.38 million (2018: Rs. 0.59 million). This analysis assumes that all other variables, in particular interest rates, remaining constant. The analysis is performed on the same basis for 2018.

The sensitivity analysis prepared is not necessarily indicative of the effects on profit for the year and assets / liabilities of the Company.

## Notes to the Financial Statements For the year ended 30 June 2019

### 37.3.2 Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. Majority of the interest rate exposure arises from borrowings from the banks. At the balance sheet date the interest rate profile of the Company's interest-bearing financial instrument was as follows:

	Carrying amount	
	2019 (Rupees in '000)	2018 (Rupees in '000)
<b>Fixed Rate Instruments</b>		
Financial liabilities	-	7,557
Financial assets	4,138	3,977
<b>Variable rate instruments</b>		
Financial liabilities	2,287,863	2,129,707
Financial assets	17,291	15,112

Above borrowings carry variable interest rates and are indexed to KIBOR. Borrowing is generally determined on the basis of business needs. Financial assets are repriced on the basis of revision of discount rates by SBP.

#### Fair value sensitivity analysis for fixed rate instruments

The Company does not account for fixed rate financial liabilities at fair value through profit and loss. Therefore, a change in interest rates at the reporting date would not affect profit and loss account and the equity of the Company.

#### Cash flow sensitivity analysis for variable rate instruments

A change of 100 basis points in interest rates at the reporting date would have increased / (decreased) profit as of 30 June 2019 by Rs. 3.39 million (2018: Rs. 3.84 million). This analysis assumes that all other variables, in particular foreign currency rates, remain constant. The analysis is performed on the same basis for 2018.

The sensitivity analysis prepared is not necessarily indicative of the effects on profit for the year and assets / liabilities of the Company.

#### Interest rate analysis of the financial instruments

A summary of the Company's interest rate gap position, analysed by the earlier of contractual repricing or maturity date is as follows:

	2019		2018

### 37.5 Capital risk management

The objective of the Company when managing capital is to safeguard its ability to continue as a going concern so that it can continue to provide returns for shareholders and benefits for other stakeholders; and to maintain a strong capital base to support the sustained development of its businesses.

The Company manages its capital structure by monitoring return on net assets and makes adjustments to it in the light of changes in economic conditions. In order to maintain or adjust the capital structure, the Company may adjust the amount of dividend to the shareholders or issue bonus / new shares.

The Company is not subject to externally imposed capital requirements.

### 37.6 Fair value of financial instruments

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

Underlying the definition of fair value is the presumption that the Company is a going concern without any intention or requirement to curtail materially the scale of its operations or to undertake a transaction on adverse terms.

The fair value of financial assets and liabilities traded in active markets i.e. listed equity shares are based on the quoted market prices at the close of trading on the period end date. The quoted market prices used for financial assets held by the Company is current bid price.

A financial instrument is regarded as quoted in an active market if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service, or regulatory agency, and those prices represent actual and regularly occurring market transactions on an arm's length basis.

IFRS 13, 'Fair Value Measurements' requires the Company to classify fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

- Quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date (level 1).
- Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly (level 2).
- Unobservable inputs for the asset or liability (level 3).

The following table shows the carrying amounts and fair values of financial assets and financial liabilities, including their levels in the fair value hierarchy.

## Highlights of the Annual General Meeting 2018

Issues/Queries	Responses	Implementation
The shareholders expressed concerns regarding the benefits being provided to Chinese imports which would impact the Company's profits.	The Government of Pakistan has provided exemptions to CPEC projects, which has allowing significant levels of Chinese cable to be brought into the country, however the Company was raising its concerns to the Governmental levels in order to raise awareness.	Efforts were underway.
The shareholders appreciated the fact that not only was there a female board member but even more so that she was chairing the AGM and hoped that other companies would follow suit in being so progressive.	The Company is an equal opportunity and merit based employer and made efforts to ensure a safe and harmonious work space for both genders.	There are now two female Board members.
The shareholders expressed concern over the rupee's significant devaluation and inquire about the Company's intended strategies regarding the same.	The devaluation was a concern, however if it was predictable or gradual it could be budgeted. It was in fact the sharp jerks that caused uncertainty and concern.	As a large portion of the Company's inputs are imported, the Company does it's best to pass on the rise in input costs to the consumer. As such there were several price increases over the time period.
The shareholders inquired if lobbying efforts were underway with the Government to secure industry protection?	The Company was independently, as well as via the All Pakistan Cables and Conductors Manufacturer's Association, engaging with the Government to get some manner of protection from the Government.	Efforts were underway.
