PUNJAB OIL MILLS LIMITED

INDEPENDENT AUDITOR'S REVIEW REPORT REPORT ON REVIEW OF INTERIM FINANCIAL STATEMENTS

PUNJAB OIL MILLS LIMITED

Directors' Report

Introduction

We have reviewed the accompanying condensed interim statement of financial position of **Punjab Oil Mills Limited** ("the company") as at December 31, 2019 and the related condensed interim statement of profit or loss and other comprehensive income, condensed interim statement of cash flows, and condensed interim statement of changes in equity and notes to the financial statements for the six-month period then ended (here-in-after referred to as the "interim financial statements"). Management is responsible for the preparation and presentation of these interim financial statements in accordance with accounting and reporting standards as applicable in Pakistan for interim financial reporting. Our responsibility is to express a conclusion on these interim financial statements based on our review.

The figures of the condensed interim statement of profit or loss and other comprehensive income for the quarters ended 31 December 2019 and 31 December 2018 have not been reviewed, as we are required to review only the cumulative figures for the six-months period ended 31 December 2019.

Scope of Review

We conducted our review in accordance with International Standard on Review Engagements 2410, "*Review of Interim Financial Information Performed by the Independent Auditor of the Entity*". A review of interim financial statements consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the accompanying interim financial statements are not prepared, in all material respects, in accordance with the accounting and reporting standards as applicable in Pakistan for interim financial reporting.

The engagement partner on the review resulting in this independent auditor's review report is Shahid Mehmood.

Operating Performance

Sales revenue for the 6 months under review decreased by 4.6% compared to the same period last year. This was a combination of both lower prices and lower volumes for the period, mostly owing to the first quarter where revenues were down by 12% due to a severe market disruptions as outlined in our last report. However, we experienced a recovery in sales for the 2nd quarter as both volumes and revenue improved by 1.6% and 1.1% respectively as market conditions stabilized.

Our gross margins were stable quarter on quarter and came in at 17% for the 6 months. As a result of better margins at the gross level, gross profits for the 6 months increased by 16.5% despite lower revenue compared to same period last year.

Operating margins were also stable at the 6% mark compared to both previous quarter (6%) and same period last year (5.7%). However, it is pertinent to note 2 cost items that have shown an unusual increase this period. First, we paid PKR 4.5mn to the CDA for renewal of our property lease which caused the rent, rates and taxes head to increase by 62.5% for the year. This and a 13.8% increase in payroll cost were major contributors to the 20% rise in administration expenses. Second, we made higher provisioning for advertisement expenses for the period keeping in view the total estimated cost for the year and apportioning it across the year instead of only provisioning it in the months where advertisement actually takes place. Consequently, despite higher gross profits, the operating profit was about unchanged from same period last year.

The change in financial charges was also significant for the period under review, with a 35.5% increase from the previous period, mainly on account of higher interest rates and increased bank borrowing to finance working capital. Together with higher other income and lower other charges, this had a net impact on profit before tax of a 1.1% decrease for the six months.

With taxation marginally higher for the period, the company posted a profit after tax of PKR 71.7 million for the 6 months, a 4.5% reduction from after-tax profit of PKR 75.1 million recorded same period last year.

Outlook for the Year

Going forward we foresee a very challenging environment for the industry and the company. This is stemming from both international and domestic factors that are likely to put our margins and growth plans under severe pressure.

Domestically there has been intense pressure from the government to reduce prices of our products. Prices had risen significantly due to both devaluation of the rupee as well

CONDENSED INTERIM STATEMENT OF FINANCIAL POSITION (UN-AUDITED)
AS AT 31 DECEMBER, 2019

as a sudden jump in international prices of edible oil due to supply/demand factors. With other food commodities also increasing in prices, the government acted on political compulsions to initiate various regulatory measures to stem this increase. Unfortunately, some of these measures affecting our industry were not in line with market realities and were done in haste, resulting in great uncertainty for the trade who are now reluctant to hold inventories, bringing sales growth to a stand-still. In addition, the industry has gone into litigation against price-fixation orders passed by the Punjab Government and though a temporary relief has been granted to the industry the matter is still unresolved. At the same time with both inflation and interest rates at their highest levels, we believe we will face lower margins for the latter half of the year.

Internationally, we are experiencing above average volatility in oil markets. Whereas in the early part of QTR 3 oil prices climbed to unexpected heights over demand growth coupled with reduced supply, the latter part saw the markets suddenly crashing on fears of corona-virus negatively impacting demand for edible oil from China as well as the global economy. This has left us with high costing inventory that will have to be disposed off at a time when market conditions necessitate aggressive pricing to maintain sales and market share; especially with the onset of Ramzan and government scrutiny of product prices.

Given the above scenario we are taking a prudent approach, and assuming a scenario of reduced profitability for the latter half of the year. As such we need to prioritize our cash out-flows towards maintaining our sales and carrying out necessary upgrades to our plant and machinery; especially any activity that reduces our costs.

Acknowledgements

We would like to take this opportunity to thank our customers, suppliers and bankers for their continued support and cooperation towards the progress of the company. We hope that this support would continue in the future as well.

We would also like to thank our dedicated and talented team of executives, staff and workers for the hard work put in during the period. We expect continued efforts from our employees to achieve even better results in the next three months.

And last, but not the least, the management is thankful to the board for its strong support and guidance in executing the vision and objectives set for the company.
